## PROFESSIONAL EXPERIENCE

### Software Engineer — HCL Technologies, Chennai, India

Sep 2021 – Jan 2025

- Developed Python scripts to automate data extraction and transformation processes, reducing manual effort by **40%** for recurring reporting tasks.
- Engineered and optimized SQL queries for complex joins and data validation across PostgreSQL and Oracle databases, improving query execution times by an average of **30%**.
- Designed and implemented REST APIs using Java Spring Boot for seamless integration between enterprise systems, supporting a daily transaction volume of approximately **15,000**.
- Contributed to large-scale architectural modernization initiatives within an Agile Scrum framework, focusing on data pipeline reliability and performance tuning.
- Monitored and troubleshoot data pipelines using Splunk and CloudWatch, ensuring high availability and addressing critical incidents within defined SLA parameters.
- Documented data models, ETL workflows, and engineering processes, enhancing transparency and maintainability for a team of **5** engineers.
- Containerized data processing services using Docker and deployed them to AWS EC2 instances, streamlining the deployment lifecycle.

## SKILLS

**Programming Languages** – Python, SQL, Java

**Databases** – PostgreSQL, Oracle, MySQL, SQL Server

**Cloud Platforms** – AWS (EC2, S3, Lambda, CloudWatch)

**Data Engineering Tools** – ETL, Data Warehousing, Data Governance, Data Quality, SAFe Agile

**DevOps & Methodologies** – Agile, Scrum, DevOps, Jenkins, Git, Jira, Confluence

**Data Processing & Transformation** – Data Integration, Data Pipelines, Performance Tuning, Stored Procedures

## PROJECTS

### Automated Data Ingestion and Transformation Pipeline

- Developed a Python-based ETL pipeline to ingest data from multiple structured and semi-structured sources, including API endpoints and database extracts.
- Implemented robust data transformation logic using pandas and SQL to clean, validate, and enrich raw data, preparing it for downstream analytics use cases.
- Integrated the pipeline with Jenkins for automated scheduling and execution, ensuring reliable daily data loads for business intelligence reporting.

### Relational Database Performance Optimization

- Analyzed and refactored inefficient SQL queries across large PostgreSQL datasets, identifying bottlenecks and implementing strategic indexing.
- Optimized stored procedures and complex join operations, resulting in a **35%** reduction in average query response time for critical reports.
- Collaborated with business analysts to understand data requirements and ensure the optimized data models supported accurate and timely reporting.

## EDUCATION

### M.Sc. Data Analytics — National College of Ireland, Dublin

Feb 2026

### B.E. Computer Science — SNS College of Technology, Coimbatore, India

2021

## CERTIFICATIONS

---

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
