PROFESSIONAL EXPERIENCE

Software Engineer — HCL Technologies, Chennai, India

Sep 2021 – Jan 2025

- Architected and deployed cloud-native infrastructure on **Microsoft Azure** using **Terraform** for managing a fleet of **Kubernetes** clusters (AKS), ensuring consistent environments across development and production.
- Engineered and maintained **CI/CD pipelines** using **Jenkins** and **GitLab CI**, automating build, test, and deployment processes for microservices, reducing manual intervention by 40%.
- Developed **Python** scripts to automate infrastructure provisioning, configuration management, and routine operational tasks, improving deployment speed and reliability for platform services.
- Implemented comprehensive **logging, monitoring, and alerting** solutions using **Prometheus**, **Grafana**, and **Azure Monitor**, enhancing system observability and enabling proactive incident detection for distributed systems.
- Managed and troubleshoot large-scale **Linux** environments, focusing on performance tuning, security hardening, and efficient log analysis to maintain high system availability.
- Collaborated with software engineering teams to define and implement infrastructure requirements, participating in architecture discussions and technical design reviews for new platform features.
- Supported **distributed systems** and **messaging-based architectures**, ensuring reliability and scalability of inter-service communication for critical cloud-native platforms.

SKILLS

Cloud Platforms – Microsoft Azure, AKS, Azure Monitor, EC2, S3, Lambda, CloudWatch

CI/CD & DevOps Tools – Jenkins, GitLab CI, Terraform, Docker, Kubernetes, Helm, Git

Infrastructure & OS – Linux, Bash Scripting, Shell Scripting

Programming & Scripting – Python, Go, Bash

Observability & Reliability – Prometheus, Grafana, Splunk, Dynatrace, Logging, Monitoring, Alerting

Databases & Messaging – PostgreSQL, MySQL, Oracle, RabbitMQ

PROJECTS

Azure Kubernetes Platform Automation

- Designed and implemented an **laC solution using Terraform** to provision and manage a multi-node **Azure Kubernetes Service (AKS)** cluster, including networking, storage, and security configurations.
- Developed **Python** scripts integrated with the Terraform workflow to automate the deployment of common platform services and application stacks onto the AKS cluster.
- Configured **Prometheus** and **Grafana** for cluster-wide monitoring and alerting, establishing dashboards to track resource utilization, pod health, and application latency.

Automated CI/CD Pipeline for Microservices

- Built a robust **CI/CD pipeline using Jenkins** and **Git** to automate the build, testing, and deployment of multiple microservices to a containerized environment.
- Integrated automated testing frameworks into the pipeline, ensuring code quality and catching regressions early in the development cycle, reducing critical bugs in production by 30%.
- Containerized microservices using **Docker**, creating efficient build images and ensuring consistent deployment across different environments.

EDUCATION

M.Sc. Data Analytics — National College of Ireland, Dublin

Feb 2026

B.E. Computer Science — SNS College of Technology, Coimbatore, India

2021

CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
