PROFESSIONAL EXPERIENCE

Software Engineer — HCL Technologies, Chennai, India

Sep 2021 – Jan 2025

- Developed and maintained **Java Spring Boot** microservices, implementing RESTful APIs for core platform functionalities and ensuring seamless inter-service communication.
- Designed and built robust data pipelines using **Python** and **pandas** to ingest, transform, and load data from various sources into analytical data stores, supporting operational reporting needs.
- Managed production support for critical enterprise applications, responding to P1/P2 incidents, performing root cause analysis, and ensuring adherence to strict service-level agreements (SLAs) using **Splunk** and **Dynatrace**.
- Contributed to the development of a decentralized digital finance platform, writing **Node.js** and **JavaScript** code for backend services and integrating with databases like **MySQL**.
- Implemented security best practices across backend services, including input validation and secure data handling, to protect user assets and sensitive information on a global platform.
- Engineered scalable backend solutions designed to accommodate platform growth and an evolving user base, ensuring responsive and real-time service delivery.
- Containerized backend services using **Docker** and deployed them to cloud environments, managing configuration and basic resource allocation for predictable rollouts.

SKILLS

Backend Development – Node.js, JavaScript, Java, Spring Boot, Microservices Architecture, REST APIs, Python, Flask, FastAPI

Databases – MySQL, MongoDB, PostgreSQL, Oracle, SQL

Cloud & DevOps – AWS (EC2, S3, Lambda, CloudWatch), Docker, CI/CD, Jenkins, Git

Security – Security Awareness, Secure Coding Practices, Input Validation

Methodologies – Agile Methodologies, Scrum

Peer-to-Peer – Peer-to-Peer Technologies

PROJECTS

Scalable Backend Service for Digital Asset Transactions

- Developed a **Java Spring Boot** backend service to manage transaction flows for digital assets, handling approximately 500 transactions per second during peak load.
- Integrated with **PostgreSQL** for persistent storage of transaction records and user data, implementing efficient queries for data retrieval and auditing.
- Designed and implemented RESTful APIs for external wallet integrations, enabling secure and reliable data exchange with partner systems.

Python-based Data Ingestion and Processing Pipeline

- Built a data ingestion pipeline using **Python**, **pandas**, and **SQL** to process and validate high-volume transaction data from multiple upstream sources.
- Automated the generation of daily operational reports on transaction volumes and error rates, reducing manual effort by 80% for the finance operations team.
- Applied data quality checks and cleansing routines to ensure data integrity before loading into the central data warehouse.

EDUCATION

M.Sc. Data Analytics — National College of Ireland, Dublin

Feb 2026

B.E. Computer Science — SNS College of Technology, Coimbatore, India

2021

CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
