PROFESSIONAL EXPERIENCE

Software Engineer — HCL Technologies, Chennai, India

Sep 2021 – Jan 2025

- Managed production incidents for enterprise applications using **Splunk** and **Dynatrace**, adhering to strict SLAs and coordinating P1/P2 response efforts.
- Automated data extraction and reporting tasks for finance operations using **Python** scripting, developing ETL pipelines that processed approximately **50 GB** of daily data.
- Developed and maintained REST APIs using **Java Spring Boot** for cross-system integrations, handling roughly **2,000 requests per minute**.
- Supported and integrated enterprise business systems, including ERP modules, coordinating change-control management for system configuration updates and UAT.
- Resolved end-user technical issues and system access requests through the **Jira** ticketing system, ensuring timely resolution within defined service levels.
- Performed ad-hoc data analysis and validation queries across **PostgreSQL** and **MySQL** databases for operational reporting and data integrity checks.
- Containerized Java Spring Boot applications using **Docker** and deployed them to **AWS EC2** instances managed via **Jenkins** CI/CD pipelines.

SKILLS

Languages – Java, Python, SQL, R, Linux Shell Scripting.

Frameworks/Libraries – Spring Boot, Hibernate, JPA, pandas, NumPy, scikit-learn, Flask, FastAPI.

Databases – PostgreSQL, MySQL, Oracle.

Cloud/DevOps – AWS (EC2, S3, Lambda, CloudWatch), Docker, Jenkins, Git.

Monitoring/Observability – Splunk, Dynatrace.

BI/Analytics – Power BI, Tableau, DAX, Power Query.

Methodologies – Agile, Scrum.

PROJECTS

Enterprise Application Support Dashboard (HCL Technologies)

- Developed a comprehensive dashboard in **Power BI** to monitor key performance indicators and operational health of enterprise applications, visualizing data from **Splunk** and custom log sources.
- Engineered automated **Python** scripts to parse application logs, identify recurring error patterns, and generate daily incident summaries for the operations team, reducing manual analysis time by **~40%**.
- Collaborated with business analysts to refine alert configurations and reporting metrics, ensuring the dashboard provided actionable insights into system stability and user impact.

Financial Transaction Reconciliation System (HCL Technologies)

- Built backend services in **Java Spring Boot** to process and reconcile financial transaction data streams from multiple sources, using **JPA** for data persistence against a **PostgreSQL** database.
- Implemented automated data validation checks and exception handling routines to identify discrepancies in transaction flows, flagging approximately **1,500** mismatched records per week for review.
- Designed and deployed the application on **AWS EC2**, integrating with **Jenkins** for continuous integration and deployment of updates.

EDUCATION

M.Sc. Data Analytics — National College of Ireland, Dublin

Feb 2026

B.E. Computer Science — SNS College of Technology, Coimbatore, India

2021

CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
