PROFESSIONAL EXPERIENCE

Software Engineer — HCL Technologies, Chennai, India

Sep 2021 – Jan 2025

- Managed end-to-end analysis and reconciliation of interchange and scheme fees across multiple payment networks, identifying and resolving discrepancies in financial data.
- Developed and maintained advanced spreadsheets and statistical models to support financial analyses, including budgeting, forecasting, and expense allocation for management reporting.
- Prepared comprehensive management reports and presentations, translating complex financial insights into actionable recommendations for various stakeholder levels.
- Assisted in the development and enhancement of financial applications and tools, contributing to process improvements and data accuracy within the team's reporting systems.
- Investigated and resolved exceptions and errors in financial data sourced from reporting systems, ensuring the integrity of interchange and scheme fee calculations.
- Analyzed card network bulletins (Visa, Mastercard, AMEX) to track rate changes and implement product updates, maintaining procedural documentation for fee management.
- Containerized financial reporting services using **Docker** and deployed them to a **Kubernetes** cluster on **AWS**, improving deployment consistency and scalability.

SKILLS

Financial Analysis – Budgeting, Forecasting, Expense Allocation, Financial Reporting, Cost Reconciliation

Data Analysis & Visualization – Advanced MS Excel, SQL, Data Mining, Statistical Models, Power BI, Tableau

Payment Networks – Interchange Fees, Scheme Fees, Card Transactions, Payment Processing

Technical Skills – Python, Java, Spring Boot, REST APIs, AWS, Docker, Kubernetes, PostgreSQL, Linux

Methodologies – Agile, Scrum, Change Management

PROJECTS

Interchange Fee Analysis Dashboard (HCL Technologies)

- Developed an interactive **Power BI** dashboard to visualize interchange fee structures and trends for a financial services client, enabling clearer understanding of cost drivers.
- Engineered **Python** scripts to automate the extraction, transformation, and loading (ETL) of transaction data from multiple sources into a data warehouse for analysis.
- Wrote complex **SQL** queries against a **PostgreSQL** database to validate fee calculations and support reconciliation workflows, identifying data anomalies for resolution.

Financial Operations Automation (HCL Technologies)

- Built automated reconciliation workflows using **Python** and **SQL** to compare transaction records against fee schedules, reducing manual effort by approximately 30%.
- Integrated **Java Spring Boot** microservices with existing enterprise systems to streamline data exchange for operational reporting and analysis.
- Implemented robust logging and monitoring for automated processes using **Splunk**, ensuring timely alerts for any failures or data discrepancies.

EDUCATION

M.Sc. Data Analytics — National College of Ireland, Dublin

Feb 2026

B.E. Computer Science — SNS College of Technology, Coimbatore, India

2021

CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
