PROFESSIONAL EXPERIENCE

Software Engineer — HCL Technologies, Chennai, India

Sep 2021 – Jan 2025

- Designed and implemented **CI/CD pipelines** using **Jenkins** and **Git** for automated application builds and deployments, reducing manual intervention by approximately 40%.
- Managed and optimized **AWS** infrastructure, including **EC2** instances, **S3** storage, and **Lambda** functions, ensuring high availability for production services.
- Developed **Python** scripts to automate routine system administration tasks and data processing workflows, improving operational efficiency for the team.
- Configured and maintained **Linux** server environments, including log analysis using **Splunk** and shell scripting for cron jobs and system monitoring.
- Implemented **Docker** containerization for microservices, facilitating consistent deployment across development, staging, and production environments.
- Automated infrastructure provisioning and management using **Terraform**, enabling repeatable and scalable cloud deployments.
- Integrated **telemetry tools** for collecting metrics, logs, and traces across distributed systems to enhance observability and proactive issue detection.

SKILLS

Cloud Platforms – Amazon Web Services (AWS), EC2, S3, Lambda, CloudWatch

CI/CD & DevOps Tools – Jenkins, GitHub Actions, Docker, Kubernetes, Terraform, Packer, Consul, Vault

Languages – Python, Linux Shell Scripting

Databases – RDS

Methodologies – DevOps, Agile Principles

PROJECTS

Automated Cloud Infrastructure Deployment

- Designed and deployed a **Terraform**-based infrastructure-as-code solution for managing **AWS** resources, including VPCs, EC2 instances, and RDS databases.
- Implemented **CI/CD pipelines** with **Jenkins** to automate the build, test, and deployment of infrastructure changes, ensuring rapid and reliable environment provisioning.
- Configured **Docker** containers for application deployment, integrating with the automated provisioning workflow to ensure consistency from code to cloud.

Observability Platform Enhancement

- Integrated **telemetry tools** into existing applications to collect comprehensive metrics, logs, and traces, providing deeper insights into system performance.
- Developed **Python** scripts to parse and aggregate log data from multiple sources, feeding into a centralized monitoring dashboard for faster issue diagnosis.
- Automated the deployment and scaling of the observability stack on **Kubernetes**, ensuring resilience and performance for the monitoring infrastructure.

EDUCATION

M.Sc. Data Analytics — National College of Ireland, Dublin

Feb 2026

B.E. Computer Science — SNS College of Technology, Coimbatore, India

2021

CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
