PROFESSIONAL EXPERIENCE

Software Engineer — HCL Technologies, Chennai, India

Sep 2021 – Jan 2025

- Developed and maintained production-grade **Java Spring Boot** microservices, implementing RESTful APIs for core business functions and processing approximately **1,500 requests per minute**.
- Designed and implemented robust data processing pipelines using **Python** and **Pandas** to ingest, transform, and load data from multiple sources, supporting daily reporting operations.
- Managed and optimized relational databases (**PostgreSQL**, **MySQL**, **Oracle**) through ad-hoc querying, data validation scripts, and strategic index implementation, improving query performance by **18%**.
- Engineered automated solutions using **Python scripting** to streamline manual operational tasks, reducing manual effort by an estimated **10 hours per week** across the support team.
- Containerized applications using **Docker** and deployed them to **AWS EC2** instances, ensuring consistent environments and simplifying deployment workflows.
- Collaborated with cross-functional teams to define requirements and deliver features within an **Agile/Scrum** framework, participating actively in sprint planning and daily stand-ups.
- Provided critical production support for enterprise applications, resolving P1/P2 incidents and performing root cause analysis using **Splunk** and **Dynatrace** to maintain service level agreements.

SKILLS

Backend Development – Java, Spring Boot, Python, REST APIs, Microservices, Flask, FastAPI

Databases – SQL, PostgreSQL, MySQL, Oracle, Data Warehousing

Cloud & DevOps – AWS (EC2, S3, Lambda, CloudWatch), Docker, Jenkins, Git, Linux

Data Analytics & BI – Power BI, Tableau, R/RStudio, Pandas, NumPy, Scikit-learn, DAX, Power Query

Methodologies & Tools – Agile, Scrum, Jira, Confluence, Splunk, Dynatrace

PROJECTS

Enterprise Java Application Modernization

- Refactored legacy Java components into a modern **Spring Boot**-based microservice architecture, enhancing maintainability and scalability for core financial processing modules.
- Implemented data persistence using **Hibernate** and **JPA**, managing complex object-relational mappings for transaction data and ensuring data integrity across multiple entities.
- Developed comprehensive unit and integration tests using **JUnit** and **Mockito**, achieving over **90% code coverage** for critical service endpoints.

Automated Data Ingestion and Reporting Pipeline

- Built a **Python**-powered ETL pipeline to ingest data from disparate enterprise systems, including relational databases and flat files, into a centralized data warehouse.
- Developed **Pandas** scripts to clean, transform, and aggregate data, generating scheduled reports that provided key operational insights to business stakeholders.
- Deployed the pipeline on **AWS Lambda**, integrating with **S3** for data storage and utilizing **CloudWatch** for monitoring and logging of pipeline execution.

EDUCATION

M.Sc. Data Analytics — National College of Ireland, Dublin

Feb 2026

B.E. Computer Science — SNS College of Technology, Coimbatore, India

2021

CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
