PROFESSIONAL EXPERIENCE

Software Engineer — HCL Technologies, Chennai, India

Sep 2021 – Jan 2025

- Developed and maintained **Java Spring Boot** REST APIs for inter-service communication, handling approximately **1,500 requests per minute** across multiple microservices.
- Implemented robust persistence layers using **Hibernate** and **JPA**, managing complex data models and ensuring data integrity for enterprise applications.
- Engineered **JUnit** and **Mockito** test suites for critical Java components, achieving over **90% code coverage** and reducing production defects by **18%**.
- Authored detailed technical design documents and conducted thorough **code reviews** for new feature development, ensuring adherence to architectural standards and best practices.
- Participated actively in **Agile Scrum ceremonies**, including sprint planning and daily stand-ups, contributing to accurate technical estimations for project timelines.
- Containerized backend services using **Docker**, defining multi-stage builds and optimizing image sizes to reduce deployment times by **30%**.
- Managed and troubleshooted issues in a **Linux** production environment, performing log analysis using **Splunk** and resolving critical incidents within defined SLA targets.

SKILLS

Languages – Java, Python, SQL, R

Frameworks/Libraries – Spring Boot, Hibernate, JPA, JUnit, Mockito, pandas, NumPy, scikit-learn, FastAPI

Cloud/DevOps – AWS (EC2, S3, Lambda, CloudWatch), Docker, Jenkins, Git

Databases – PostgreSQL, MySQL, Oracle

Tools/Platforms – Splunk, Dynatrace, Jira, Confluence, Power BI, Tableau

Methodologies – Agile, Scrum

PROJECTS

Enterprise Java Microservices with Hibernate

- Designed and implemented a suite of **Java Spring Boot** microservices to manage core business logic, integrating with a PostgreSQL database.
- Utilized **Hibernate** for object-relational mapping, optimizing database interactions and ensuring efficient data retrieval for reporting modules.
- Developed comprehensive RESTful APIs with clear contracts, enabling seamless integration with downstream client applications and internal systems.

Automated Data Processing Pipeline

- Built a **Python**-based ETL pipeline to ingest, transform, and load data from disparate sources into a centralized data warehouse.
- Automated scheduled reporting processes using **pandas** and SQL queries, reducing manual effort by approximately **15 hours per week**.
- Implemented data validation checks and error handling mechanisms to ensure data quality and integrity throughout the pipeline.

EDUCATION

M.Sc. Data Analytics — National College of Ireland, Dublin

Feb 2026

B.E. Computer Science — SNS College of Technology, Coimbatore, India

2021

CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
