PROFESSIONAL EXPERIENCE

Software Engineer — HCL Technologies, Chennai, India

Sep 2021 – Jan 2025

- Analyzed **financial and non-financial data** for enterprise customers to assess business health and identify potential risks in funding requests.
- Quantified the inherent risks associated with **eCommerce businesses** and Wayflyer's provision of capital, developing mitigation strategies.
- Collaborated with cross-functional teams, including sales and operations, to understand customer acquisition and relationship management strategies.
- Supported management in building and implementing **new operational processes** and product enhancements to streamline lending workflows.
- Managed and analyzed aspects of the existing loan portfolio, identifying and reporting on **risky relationships** for potential exit.
- Developed and maintained **SQL queries** for ad-hoc analysis of customer financial data, supporting credit assessment and portfolio monitoring.
- Containerized Java Spring Boot applications using **Docker**, deploying them to **AWS EC2** instances and managing configurations via Jenkins pipelines.

SKILLS

Finance & Risk – Credit Risk Analysis, Portfolio Management, Financial Reporting, eCommerce Business Risk, Data Analysis

Programming & Data – SQL, Python, Java, Spring Boot, pandas, NumPy, scikit-learn

Cloud & DevOps – AWS (EC2, S3, Lambda, CloudWatch), Docker, Jenkins, Git, CI/CD

Business & Operations – Stakeholder Management, Process Improvement, Requirements Gathering, Agile Methodologies, Financial Modelling

BI & Analytics – Power BI, Tableau, DAX, Power Query, Data Modelling, Statistical Analysis

PROJECTS

Customer Financial Health Assessment Tool

- Developed a Python-based tool to ingest and analyze customer financial statements (P&L, Balance Sheet) and operational metrics, flagging key risk indicators for enterprise clients.
- Integrated **SQL queries** against a PostgreSQL database to extract historical transaction data and reconcile against reported figures, improving data validation accuracy by 20%.
- Built interactive **Power BI dashboards** to visualize customer financial health scores, key risk drivers, and funding recommendations for senior stakeholders.

Automated Loan Portfolio Risk Reporting

- Engineered Python scripts to automate the aggregation of loan performance data from multiple sources, reducing manual reporting time by 15 hours per week.
- Implemented data validation checks and anomaly detection algorithms using **pandas** and **scikit-learn** to identify potential portfolio risks, flagging ~5% of accounts for further review.
- Generated summary reports on loan portfolio status, risk exposure, and performance trends, delivered weekly to the credit risk management team.

EDUCATION

M.Sc. Data Analytics — National College of Ireland, Dublin

Feb 2026

B.E. Computer Science — SNS College of Technology, Coimbatore, India

2021

CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
