PROFESSIONAL EXPERIENCE

Software Engineer — HCL Technologies, Chennai, India

Sep 2021 – Jan 2025

- Configured and managed **AWS EC2 instances** and **S3 buckets** for application deployment and data storage, supporting a team of 8 engineers.
- Automated report generation using **Python scripting**, processing ~15,000 records daily to deliver operational insights to business stakeholders.
- Developed and maintained **Java Spring Boot REST APIs** for internal services, ensuring seamless data exchange across distributed systems.
- Implemented automated build and deployment pipelines using **Jenkins** and **Git**, reducing deployment cycle time by 30%.
- Participated in on-call rotations, responding to and resolving P1/P2 incidents within defined SLAs using **Splunk** and **Dynatrace** for log analysis and performance monitoring.
- Contributed to the containerization of services using **Docker**, preparing them for deployment on cloud platforms.
- Managed and optimized relational database schemas and queries in **PostgreSQL** and **MySQL**, supporting data integrity for critical enterprise systems.

SKILLS

Cloud Platforms – AWS (EC2, S3, Lambda, CloudWatch)

Languages – Python, Java, SQL, Linux Shell Scripting

Frameworks/Libraries – Spring Boot, pandas, NumPy, scikit-learn

Databases – PostgreSQL, MySQL, Oracle

CI/CD & DevOps – Jenkins, Git, Docker, Jira, Confluence

Monitoring & Observability – Splunk, Dynatrace, CloudWatch

Infrastructure as Code – Terraform, Puppet

PROJECTS

Automated Infrastructure Provisioning with Terraform

- Developed Terraform modules to automate the provisioning of **AWS infrastructure** including EC2 instances, VPCs, and S3 buckets, enabling faster environment setup for development teams.
- Integrated Terraform configurations into a **Jenkins CI/CD pipeline**, allowing for automated infrastructure deployments triggered by Git commits.
- Managed state files and access controls for a team of 5 engineers, ensuring consistent and secure infrastructure deployments.

Python-based Site Reliability Toolkit

- Created a suite of **Python scripts** to automate common SRE tasks, including log aggregation from **Splunk** and basic system health checks on Linux servers.
- Developed a command-line interface (CLI) tool using **Python** that allowed engineers to quickly query application status across multiple environments.
- Implemented basic alerting mechanisms within the scripts to notify on-call engineers of critical system events.

EDUCATION

M.Sc. Data Analytics — National College of Ireland, Dublin

Feb 2026

B.E. Computer Science — SNS College of Technology, Coimbatore, India

2021

CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
