PROFESSIONAL EXPERIENCE

Software Engineer — HCL Technologies, Chennai, India

Sep 2021 – Jan 2025

- Designed and implemented end-to-end **CI/CD pipelines** for application deployment on **OpenShift/Kubernetes**, reducing manual deployment steps by **40%**.
- Managed the lifecycle of **Helm charts** for packaging and deploying microservices, ensuring consistent environments across development, staging, and production.
- Developed and maintained **containerised applications** using **Docker**, optimizing image sizes and build times for faster deployments.
- Supported and troubleshooted **Spring Cloud-based microservices** deployments, focusing on performance tuning and resource utilization within the cluster.
- Provided **Linux administration** and troubleshooting for production environments, resolving issues related to system performance and application runtime.
- Implemented comprehensive **logging, monitoring, and alerting** using tools like **Prometheus** and **Grafana** to ensure application health and rapid issue detection.
- Authored detailed **technical documentation** for CI/CD processes, deployment strategies, and troubleshooting guides for development teams.

SKILLS

DevOps – CI/CD, OpenShift, Kubernetes, Helm, Docker, Jenkins, Git, Release Management

Cloud – AWS (EC2, S3, Lambda, CloudWatch)

Scripting – Bash, Python

Monitoring – Prometheus, Grafana, ELK Stack, Splunk, Dynatrace

Backend – Java, Spring Boot, Spring Cloud, REST APIs, Microservices

Databases – PostgreSQL, MySQL, Oracle

Operating Systems – Linux

PROJECTS

Automated Deployment Pipeline for Microservices

- Engineered a **CI/CD pipeline** using **Jenkins** and **Git** to automate the build, test, and deployment of Java Spring Boot microservices.
- Containerized applications with **Docker** and managed deployments to a test **Kubernetes** cluster, enabling faster iteration cycles for development teams.
- Implemented automated rollback strategies within the pipeline to quickly revert to stable versions in case of deployment failures.

Kubernetes Cluster Monitoring and Alerting Setup

- Configured **Prometheus** and **Grafana** to monitor application performance and resource utilization within a **Kubernetes** environment.
- Developed custom alert rules to proactively identify and notify on-call engineers of potential issues, reducing incident response time by approximately **20%**.
- Integrated logging data from the **ELK Stack** with Grafana dashboards for comprehensive system observability.

EDUCATION

M.Sc. Data Analytics — National College of Ireland, Dublin

Feb 2026

B.E. Computer Science — SNS College of Technology, Coimbatore, India

2021

CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
