## PROFESSIONAL EXPERIENCE

### Software Engineer — HCL Technologies, Chennai, India

Sep 2021 – Jan 2025

- Collaborated with enterprise clients to gather feature pipeline requirements, translating them into **Python** implementations for the ML platform, acting as the primary technical contact during onboarding.
- Engineered and optimized **Python** feature pipelines on **AWS Lambda** and **S3** to support downstream ML scoring, processing approximately 3,500 events per second during peak hours.
- Developed and deployed **Java Spring Boot** REST APIs for robust data exchange between internal services, incorporating request validation and circuit-breaker patterns to enhance system resilience.
- Authored comprehensive production runbooks and internal technical documentation that enabled the customer onboarding team to reduce new client implementation time by over 60%.
- Designed and implemented mutual-TLS device identity and certificate rotation for a 5,000-node **Linux** controller fleet, integrating short-lived tokens issued by a **NestJS** auth service backed by **PostgreSQL**.
- Performed production support and incident response for enterprise applications, analyzing logs using **Splunk** and **Dynatrace** to resolve P1/P2 incidents within strict SLAs.

## SKILLS

**Languages** – Python, Java, SQL, R, Bash

**Frameworks/Libraries** – Spring Boot, NestJS, pandas, NumPy, scikit-learn, FastAPI

**Cloud/Infrastructure** – AWS (EC2, S3, Lambda, CloudWatch), Docker, Kubernetes, Linux

**Databases** – PostgreSQL, MySQL, Oracle

**Tools/Platforms** – Jenkins, Git, Jira, Confluence, Splunk, Dynatrace, Power BI, Tableau

**ML/Data** – Feature Engineering, ML Ops, Data Analytics, Data Warehousing, DAX, Power Query

**Methodologies** – Agile, Scrum

## PROJECTS

### Customer Onboarding Playbook for ML Feature Store

- Partnered directly with two pilot enterprise customers to design and deliver a guided onboarding flow for an internal ML feature store, including SDK examples and debug tooling.
- Developed a **Python** CLI to validate customer feature definitions against the platform schema, catching approximately 70% of schema errors at write time, significantly reducing downstream training failures.
- Delivered two technical workshops to customer data science teams, upskilling them on platform integration patterns and best practices for feature development, accelerating their time-to-first-feature from ~6 weeks to 9 days.

### Fraud Detection Model on Transaction Features

- Engineered a feature pipeline using **Python** and **SQL** to extract behavioral signals from a transaction log of approximately 1.1 million records.
- Trained a **LightGBM** classifier on the derived features, tuning class weights to address a 1:140 fraud imbalance and achieving an AUC of ~0.91 on held-out data.
- Packaged the trained model behind a **FastAPI** inference endpoint with input validation and basic feature-drift logging, achieving a p95 latency of around 180ms.

## EDUCATION

### M.Sc. Data Analytics — National College of Ireland, Dublin

Feb 2026

### B.E. Computer Science — SNS College of Technology, Coimbatore, India

2021

## CERTIFICATIONS

---

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
