PROFESSIONAL EXPERIENCE — 3.5 YEARS

Software Engineer — HCL Technologies, Chennai, India Sep 2021 – Jan 2025

- Contributed to compliance assessments against key regulations and industry-specific standards by analysing data quality and policy adherence for enterprise systems.
- Participated in client workshops to understand data challenges, gathering requirements and advising on solutions for information governance frameworks.
- Assisted in the design and documentation of data policies, procedures, and best practices to ensure consistency and reliability across organisational data assets.
- Supported the implementation of data governance frameworks, including data ownership and stewardship models, to enhance data integrity and accountability.
- Contributed to reports and presentations for clients and senior management, translating complex data governance findings into actionable insights.
- Developed Python scripts to automate data extraction and validation tasks, supporting operational reporting and data quality checks for enterprise systems.
- Managed production support for enterprise applications, responding to P1/P2 incidents and performing root cause analysis to maintain service level agreements.

SKILLS

Information Governance & Compliance – Data Policies, Data Procedures, Best Practices, Data Governance Frameworks, Data Ownership, Stewardship Models, Data Quality Standards

Data Science & Analytics – Power BI, Tableau, R, Python (pandas, NumPy, scikit-learn), SQL, Data Warehousing, ETL, Statistical Methods, Exploratory Data Analysis, A/B Testing, Time-Series Analysis, Machine Learning Fundamentals

Cloud & Infrastructure – AWS (EC2, S3, Lambda, CloudWatch), Docker, Linux, Shell Scripting

Programming & Development – Java, Spring Boot, REST APIs, Python Scripting

Project Management & Collaboration – Agile/Scrum, Jira, Confluence, Change Management, UAT Coordination

Enterprise Systems – ERP Systems, Business Systems Support

Tools – Microsoft Suite, Jenkins, Git, Splunk, Dynatrace

PROJECTS

Enterprise Data Governance Framework Implementation

- Designed and documented a comprehensive data governance framework, including data ownership, stewardship, and quality standards, for a large financial services client.
- Developed Python scripts to automate the collection and validation of data quality metrics, identifying and flagging inconsistencies across **15+ enterprise data sources**.
- Created interactive **Power BI dashboards** to visualize data quality trends and compliance status, facilitating regular reporting to senior management and operations teams.

Automated Reporting for Financial Operations

- Engineered automated Python ETL pipelines to extract, transform, and load data from multiple PostgreSQL and Oracle databases into a central data mart.
- Built scheduled reporting solutions that generated daily operational summaries, reducing manual reporting effort by an estimated **70%** for the reconciliation team.
- Implemented data validation checks within the pipelines to ensure accuracy and consistency of financial transaction data before it was used for downstream analysis.

EDUCATION

M.Sc. Data Analytics — National College of Ireland, Dublin Feb 2026

B.E. Computer Science — SNS College of Technology, Coimbatore, India 2021

CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
