PROFESSIONAL EXPERIENCE — 3.5 YEARS

Software Engineer — HCL Technologies, Chennai, India Sep 2021 – Jan 2025

- Designed and implemented **Kubernetes controllers** to automate cluster provisioning and lifecycle management, reducing manual setup time by **40%**.
- Developed **Python automation scripts** for infrastructure deployment and configuration management on **AWS**, integrating with **Jenkins** for CI/CD pipelines.
- Enhanced system observability by integrating **Prometheus** and **Grafana** for real-time monitoring and alerting across distributed services, leading to a **15%** reduction in critical incident response times.
- Authored **production runbooks** and incident response plans, reducing mean time to resolution (MTTR) for P1 incidents by approximately **22%**.
- Analyzed performance metrics from **Dynatrace** and **Splunk** to identify bottlenecks in high-traffic enterprise applications, implementing optimizations that improved resource utilization by **18%**.
- Contributed to the design and implementation of **RESTful APIs** for inter-service communication, adhering to API design best practices and ensuring scalability for enterprise customers.
- Participated in **Agile ceremonies**, performed code reviews for peer engineers, and coordinated change management processes for system updates in a regulated production environment.

SKILLS

Cloud-Native Technologies – Kubernetes, Docker, Helm, EKS, AWS

Programming Languages – Python, Go, Java, SQL

Observability & Monitoring – Prometheus, Grafana, Splunk, Dynatrace, CloudWatch

Infrastructure & Automation – Jenkins, Terraform, Ansible, Shell Scripting

Core Concepts – Site Reliability Engineering (SRE), CI/CD, REST APIs, Distributed Systems, Fault Tolerance, API Design

Databases – PostgreSQL, MySQL, Oracle

PROJECTS

Automated Kubernetes Cluster Deployment

- Developed a Python-based framework for automated **Kubernetes** cluster provisioning on **AWS EKS**, significantly reducing manual setup time for development teams.
- Integrated custom **Kubernetes operators** to manage application deployments and lifecycle, ensuring consistent configurations across multiple environments.
- Implemented comprehensive logging and monitoring using **Prometheus** and **Grafana** to track cluster health and performance for over 50 provisioned environments.

SRE Platform Observability Enhancement

- Engineered and deployed a centralized alerting system using **Prometheus Alertmanager** and custom webhook integrations, reducing alert fatigue by **30%**.
- Built **Python scripts** to aggregate metrics from various sources (e.g., application logs, cloud provider metrics) into a unified dashboard for incident analysis.
- Documented best practices for **observability** implementation and provided training to internal development teams on leveraging new monitoring tools.

EDUCATION

M.Sc. Data Analytics — National College of Ireland, Dublin Feb 2026

B.E. Computer Science — SNS College of Technology, Coimbatore, India 2021

CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
