HARIRAMAKRRISHNAN RAMACHANDRAN

+353 89 970 6156 • hariramakrrish@gmail.com • Dublin, Ireland • **Stamp 1G — Full-Time Work Eligible**

PROFESSIONAL EXPERIENCE — 3.5 YEARS

Software Engineer — HCL Technologies, Chennai, India Sep 2021 – Jan 2025

- Managed cloud infrastructure on **AWS**, including EC2, S3, and Lambda, ensuring platform availability for a learning platform with thousands of active users.
- Implemented and maintained **CI/CD pipelines** using Jenkins for automated, repeatable, and safe deployments across multiple repositories, reducing manual deployment effort by **40%**.
- Developed and executed **infrastructure as code** using Terraform to provision and manage AWS resources, standardizing environment setup and enabling faster onboarding of new services.
- Orchestrated **MongoDB Atlas** administration, including performance tuning, access control configuration, and implementing robust backup and recovery strategies, ensuring data integrity and availability.
- Established comprehensive **monitoring and alerting** systems using AWS CloudWatch and integrated with a primary incident response channel, enabling proactive identification and resolution of production issues.
- Administered user access and security configurations across **AWS IAM** and integrated services, conducting regular joiner and leaver checks to enforce least-privilege principles and maintain system security.
- Documented existing platform architecture and infrastructure as code processes, creating clear guides for technical and non-technical stakeholders, improving system understanding and reducing onboarding time for new team members.

SKILLS

Cloud & Infrastructure – AWS, EC2, S3, Lambda, IAM, CloudWatch, MongoDB Atlas, Terraform

CI/CD & Automation – Jenkins, Git, Infrastructure as Code, Shell Scripting

Operations & Reliability – Monitoring, Alerting, Incident Response, Backups, Disaster Recovery, Security Audits

Databases – MongoDB

Productivity Tools – Jira, Google Workspace

PROJECTS

AWS Infrastructure Automation for Learning Platform

- Automated the provisioning and configuration of the entire AWS infrastructure for a growing online learning platform using **Terraform**, covering compute (EC2), storage (S3), and networking components.
- Established a self-service **CI/CD pipeline** with **Jenkins** that automated build, test, and deployment stages for core platform services, decreasing deployment cycles from bi-weekly to daily.
- Implemented granular **AWS IAM** policies and managed secrets securely, ensuring least-privilege access for all services and personnel, and conducted an audit of existing credentials.

MongoDB Operations and Recovery Strategy

- Configured and maintained **MongoDB Atlas** clusters, focusing on performance optimization through indexing and query analysis, and implementing automated backup schedules to meet RPO targets.
- Developed and documented a step-by-step **disaster recovery plan** for MongoDB, including procedures for data restoration and cluster rebuilding in a separate AWS region, successfully testing the restore process.
- Integrated MongoDB metrics into a centralized **monitoring system** (CloudWatch), setting up alerts for critical events such as high connection counts and disk usage, reducing Mean Time To Detect (MTTD) by **35%**.

EDUCATION

M.Sc. Data Analytics — National College of Ireland, Dublin Feb 2026

B.E. Computer Science — SNS College of Technology, Coimbatore, India 2021

CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
