HARIRAMAKRRISHNAN RAMACHANDRAN

+353 89 970 6156 • hariramakrrish@gmail.com • Dublin, Ireland • **Stamp 1G — Full-Time Work Eligible**

PROFESSIONAL EXPERIENCE — 3.5 YEARS

Software Engineer — HCL Technologies, Chennai, India Sep 2021 – Jan 2025

- Developed and maintained integrations and workflows across employee technology systems, including **ServiceNow**, **Jira**, and **Slack**, using documented APIs and common failure case handling.
- Implemented defined detection and remediation steps for employee technology use cases, incorporating validation, error handling, logging, and escalation procedures.
- Wrote and executed tests for developed components, documenting configurations, operations, limitations, and recovery steps to ensure reliability.
- Troubleshot defects within owned components, investigating production feedback to improve reliability and usability of employee technology solutions.
- Contributed reusable scripts and connectors to a shared engineering library, enhancing the capabilities available to other team members.
- Configured and tested **AI assisted steps** within workflows, reporting inaccurate or uncertain results for review by senior engineers.
- Containerized employee technology solutions using **Docker** and deployed them to an **AWS** environment, managing configurations and basic resource limits.

SKILLS

Languages – Python, PowerShell, JavaScript

Platforms & Tools – ServiceNow, Moveworks, Jira, Slack, Nexthink, Jamf, Microsoft Intune, Microsoft 365, Microsoft Graph

Cloud & Containerization – AWS, Docker, Kubernetes

Engineering Practices – APIs, Source Control, Testing, Code Review, Deployment Procedures, Runbooks, Telemetry, Automation

AI & Automation – AI assisted workflows, Self-service automation, Remediation automation

PROJECTS

Employee Technology Automation Platform (HCL Technologies)

- Built and tested automation scripts in **Python** to streamline employee onboarding processes, integrating with HR systems and IT provisioning tools.
- Developed REST APIs for cross-system data exchange, enabling seamless integration between employee management platforms and communication tools.
- Documented solution designs, operational procedures, and recovery steps for the automation platform, facilitating knowledge transfer to support teams.

Automated Incident Remediation Tool (HCL Technologies)

- Engineered a Python-based tool to automatically detect and remediate common IT incidents, reducing manual intervention by approximately 40% for recurring issues.
- Implemented logging and error handling within the remediation scripts to ensure safe execution and provide clear audit trails for all automated actions.
- Integrated the tool with an internal monitoring system, triggering automated remediation workflows based on predefined alerts and conditions.

EDUCATION

M.Sc. Data Analytics — National College of Ireland, Dublin Feb 2026

B.E. Computer Science — SNS College of Technology, Coimbatore, India 2021

CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
