# HARIRAMAKRRISHNAN RAMACHANDRAN

+353 89 970 6156 • hariramakrrish@gmail.com • Dublin, Ireland • **Stamp 1G — Full-Time Work Eligible**

## PROFESSIONAL EXPERIENCE — 3.5 YEARS

**Software Engineer — HCL Technologies, Chennai, India** Sep 2021 – Jan 2025

- Developed and maintained **Java Spring Boot** REST APIs for internal services, handling approximately 1,500 requests per minute and supporting core business logic.
- Implemented robust data persistence layers using **Hibernate** and **JPA**, managing complex object-relational mappings for enterprise client datasets and ensuring data integrity across multiple database schemas.
- Wrote and executed unit tests using **JUnit** and **Mockito** for critical Java components, achieving over **90%** code coverage on new feature development and reducing post-deployment defects by **15%**.
- Collaborated with cross-functional teams within an Agile framework to define technical requirements, participate in sprint planning, and provide technical estimations for new feature development.
- Gained exposure to **NoSQL** database concepts through integration with a distributed document store for logging and audit trail purposes, supporting near real-time data ingestion.
- Containerized multiple Java applications using **Docker** and managed their deployment to a cloud environment, facilitating more consistent development and testing cycles.
- Managed production incidents for enterprise applications, performing root cause analysis and implementing fixes to meet strict Service Level Agreements (SLAs) for critical systems.

## SKILLS

**Languages** – Java, Python, SQL, R, English

**Frameworks** – Spring Boot, Hibernate, JPA, Flask, FastAPI, Scikit-learn, pandas, NumPy

**Databases** – PostgreSQL, MySQL, Oracle, NoSQL

**Cloud & DevOps** – AWS (EC2, S3, Lambda, CloudWatch), Docker, Jenkins, Git

**BI & Analytics** – Power BI, Tableau, DAX, Power Query, RStudio

**Methodologies** – Agile, Scrum, ITIL

## PROJECTS

### Java Enterprise Application Modernization

- Re-architected a legacy Java application module into a set of **Spring Boot microservices**, improving system modularity and enabling independent deployment cycles.
- Integrated new microservices with existing PostgreSQL databases using **Hibernate**, ensuring seamless data migration and consistent transaction handling across the distributed system.
- Containerized the new microservices with **Docker** and configured basic CI/CD pipelines in Jenkins for automated builds and deployments, reducing manual deployment time by **40%**.

### Automated Financial Transaction Reconciliation Service

- Developed a **Python**-based service to automate the reconciliation of financial transaction data from multiple sources, processing approximately **5,000** records daily.
- Implemented data extraction and transformation logic using **pandas** and SQL queries against PostgreSQL, identifying and flagging discrepancies for manual review.
- Built RESTful APIs using **FastAPI** to expose reconciliation results and status updates to an operations dashboard, improving visibility into data discrepancies.

## EDUCATION

**M.Sc. Data Analytics — National College of Ireland, Dublin** Feb 2026

**B.E. Computer Science — SNS College of Technology, Coimbatore, India** 2021

## CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
