PROFESSIONAL EXPERIENCE — 3.5 YEARS

Software Engineer — HCL Technologies, Chennai, India Sep 2021 – Jan 2025

- Designed and implemented **CI/CD pipelines** using **Jenkins** and **Git**, incorporating automated security scanning tools to identify vulnerabilities early in the development lifecycle.
- Developed and maintained **Python scripts** for automating cloud infrastructure deployment and configuration management on **AWS**, reducing manual setup time by approximately **40%**.
- Integrated **SAST**, **DAST**, and **SCA** tools into the development workflow, enabling developers to proactively address security findings within their IDEs.
- Managed and hardened **AWS IAM policies**, permission boundaries, and roles to enforce least privilege across multiple accounts and environments, significantly reducing potential attack vectors.
- Collaborated with application development teams to conduct **threat modeling** for new microservices, translating identified risks into actionable security guardrails and remediation guidance.
- Operationalized the **Wiz CNAPP platform**, triaging and prioritizing security findings, and coordinating remediation efforts with engineering teams to reduce the backlog of critical and high-severity issues.
- Containerized applications using **Docker** and deployed them to **Kubernetes** clusters (EKS), configuring network policies and security contexts to enhance workload isolation.

SKILLS

DevSecOps – SAST, DAST, SCA, Infrastructure-as-Code Scanning, Secrets Management, Policy-as-Code, Threat Modeling

Cloud Security – AWS (IAM, VPC, KMS, SCP, Config Rules), Azure (Entra ID, Defender for Cloud, Azure Policy), GCP

CI/CD & Automation – Jenkins, Git, Python, Terraform, CloudFormation, Bash Scripting

Containerization & Orchestration – Docker, Kubernetes, EKS, AKS, GKE

Security Tools – Wiz, Nessus, SonarQube, Veracode

Development Practices – Secure SDLC, Secure Coding, Vulnerability Management, Incident Support

PROJECTS

Secure AWS Infrastructure Deployment Framework

- Developed a reusable **Terraform** module for provisioning secure **AWS** environments, including hardened VPC configurations, IAM roles with least privilege, and KMS encryption for S3 buckets.
- Integrated automated security scanning using **Clair** for container images and **Checkov** for infrastructure-as-code validation directly into the **Jenkins** pipeline, catching misconfigurations before deployment.
- Authored detailed runbooks for deploying and managing the secure infrastructure framework, enabling faster onboarding for new development teams onto the platform.

Developer-First Security Guardrails Implementation

- Built a **Python**-based service that integrated with GitHub webhooks to automatically scan code for secrets using **TruffleHog** and flag potential vulnerabilities, providing developers with immediate feedback.
- Designed and implemented **policy-as-code** gates in the CI pipeline using OPA/Rego to enforce coding standards and security best practices, reducing the rate of policy violations by **60%**.
- Conducted training sessions for development teams on secure coding practices and the effective use of the new security tooling.

EDUCATION

M.Sc. Data Analytics — National College of Ireland, Dublin Feb 2026

B.E. Computer Science — SNS College of Technology, Coimbatore, India 2021

CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
