PROFESSIONAL EXPERIENCE

SOFTWARE ENGINEER – HCL Technologies | Chennai, India 09/2021 – 01/2025 (3.5 Years)

- Designed and developed scalable back-end web services using **Python** and **Flask** to support localization workflows, processing over 10,000 translation requests daily.
- Improved and evolved existing localization automation tools, reducing manual intervention by **30%** through scripting and API integration.
- Partnered cross-functionally with product engineering teams to integrate new software features into the localization pipeline, ensuring timely delivery for global markets.
- Troubleshoot and resolved complex system and integration issues within the localization infrastructure, decreasing critical bug resolution time by **25%**.
- Contributed to architecture decisions for the next generation of localization services, focusing on scalability and maintainability for future product releases.
- Developed and maintained REST APIs using **Java Spring Boot** for inter-service communication, enhancing system modularity and performance.

SKILLS

Languages – Python, Java, SQL, R, Ruby

Web Services & Frameworks – Spring Boot, Flask, REST APIs, Django, Ruby on Rails

Cloud & DevOps – AWS (EC2, S3, Lambda, CloudWatch), Docker, Jenkins, Git

Data Analytics & BI – Power BI, Tableau, DAX, Power Query, pandas, NumPy, scikit-learn, R/RStudio

Databases – PostgreSQL, MySQL, Oracle

Tools & Methodologies – Jira, Confluence, Agile/Scrum, LLMs, Generative AI Tools

EDUCATION AND TRAINING

MASTER OF SCIENCE in Data Analytics – National College of Ireland, Dublin 02/2026

BACHELOR OF ENGINEERING in Computer Science – SNS College of Technology, Coimbatore, India 01/2021

PROJECTS

Global Product Release Orchestration Platform

- Engineered a **Python**-based automation platform to manage and track the localization status of software releases across multiple product lines.
- Integrated with internal APIs to ingest product build information and trigger localization workflows, improving release coordination efficiency by **20%**.
- Developed RESTful APIs using **Flask** to provide real-time status updates and reporting for release managers and localization teams.

AI-Assisted Translation Quality Assurance System

- Developed a proof-of-concept system using **Python** and **scikit-learn** to analyze translated text for consistency and potential errors, reducing manual QA effort by an estimated **15%**.
- Applied natural language processing techniques to identify linguistic deviations and flag them for review by human translators.
- Designed a dashboard using **Power BI** to visualize QA results and track common error patterns across different languages and product modules.

ACHIEVEMENTS & CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
