PROFESSIONAL EXPERIENCE

SOFTWARE ENGINEER – HCL Technologies | Chennai, India

09/2021 – 01/2025 (3.5 Years)

- Performed independent **mechanical assembly** and **electrical connections** on complex semiconductor manufacturing equipment, completing installations **15% faster** than previous benchmarks.
- Executed **system testing** protocols with senior engineer guidance, successfully troubleshooting and resolving **electrical and mechanical issues** encountered during tool integration, ensuring adherence to schematics.
- Developed **Python scripts** to automate data extraction and reporting for operational dashboards, reducing manual data collation time by **30%**.
- Managed **production support** for enterprise applications, responding to P1/P2 incidents and maintaining service level agreements (SLAs) with **99.9% uptime**.
- Coordinated system configuration updates and post-go-live support for interconnected **ERP and business systems**, managing change control processes across multiple modules.
- Designed and implemented interactive **Power BI dashboards**, transforming raw data into actionable insights for business stakeholders and improving decision-making speed by an estimated **20%**.

SKILLS

Installation & Assembly – Mechanical Assembly, Electrical Connections, Robot Calibration, Troubleshooting, Tool Inspection

Software Engineering – Java, Spring Boot, Python, REST APIs, Docker, Git, Jenkins

Cloud & Infrastructure – AWS (EC2, S3, Lambda, CloudWatch), Linux

Data Analysis & BI – Power BI, Tableau, DAX, Power Query, Data Modelling, SQL (PostgreSQL, MySQL, Oracle)

Project Management – Agile, Scrum, Jira, Confluence, Change Management, Reporting

Monitoring & Support – Splunk, Dynatrace, CloudWatch, Incident Response, SLA Management

EDUCATION AND TRAINING

MASTER OF SCIENCE in Data Analytics – National College of Ireland, Dublin

02/2026

BACHELOR OF ENGINEERING in Computer Science – SNS College of Technology, Coimbatore, India

01/2021

PROJECTS

Automated Production Monitoring Dashboard

- Developed a **Python-based data pipeline** to ingest operational logs from enterprise applications into a central data store.
- Created a **Power BI dashboard** to visualize system health, transaction throughput, and error rates, enabling real-time monitoring for production support teams.

- Implemented automated alerting mechanisms within the dashboard for critical system events, reducing incident detection time by an average of **25%**.

Semiconductor Equipment Installation & Calibration Framework

- Designed a standardized framework for **mechanical assembly and electrical connection** procedures for new semiconductor manufacturing equipment.
- Integrated **diagnostic scripts** to automate initial tool calibration and testing, reducing manual verification steps by **40%**.
- Documented troubleshooting guides for common installation issues, improving first-time fix rates for junior engineers.

ACHIEVEMENTS & CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California, Davis** (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
