PROFESSIONAL EXPERIENCE

SOFTWARE ENGINEER – HCL Technologies | Chennai, India **09/2021 – 01/2025 (3.5 Years)**

- Performed structural analysis on reinforced concrete and steel elements using **GSA**, contributing to the design of building components for a new commercial development.
- Generated detailed mark-ups for structural drawings, collaborating with **structural technicians** to produce **Revit** models that met project specifications and client requirements.
- Participated in site visits for structural investigations and progress monitoring, documenting findings and observations in comprehensive **site reports** for project stakeholders.
- Contributed to cross-functional team meetings, representing the engineering team in discussions with clients and other consultants regarding project scope and technical challenges.
- Automated data extraction and reporting processes for financial transactions using **Python scripting**, reducing manual effort by **40%** and improving data accuracy for reconciliation workflows.
- Developed and maintained **Java Spring Boot** REST APIs for integrating enterprise systems, ensuring seamless data flow and supporting system interoperability across various platforms.

SKILLS

Structural Analysis Software – GSA, Tekla Structural Designer

BIM & Design Software – Revit, AutoCAD

Engineering Disciplines – Structural Design, Civil Engineering, Building Engineering, Reinforced Concrete Design, Steel Design, Timber Design, Masonry Design

Project Management & Collaboration – Common Data Environments (ACC), Site Visits, Report Preparation, Client Meetings, Consultant Collaboration

Programming & Automation – Python, Java, Spring Boot, REST APIs, SQL

Data Analysis & BI – Power BI, DAX, Tableau, R, pandas, NumPy

Cloud & DevOps – AWS, Docker, Jenkins

EDUCATION AND TRAINING

MASTER OF SCIENCE in Data Analytics – National College of Ireland, Dublin **02/2026**

BACHELOR OF ENGINEERING in Computer Science – SNS College of Technology, Coimbatore, India **01/2021**

PROJECTS

Automated Structural Design Markup System

- Developed a Python-based tool to automate the initial markup process for structural drawings, integrating with **Revit** libraries to streamline technician workflows.
- Implemented data validation checks within the tool to ensure consistency in structural element specifications, reducing potential errors during the drawing production phase by **15%**.

- Designed a user-friendly interface for engineers to input design parameters and generate standardized mark-ups, facilitating efficient collaboration with drafting teams.

Financial Transaction Monitoring Dashboard

- Created interactive dashboards in **Power BI** to visualize key metrics for a financial services operations dashboard, including transaction volumes and error rates.
- Developed complex **DAX** measures to aggregate and analyze transaction data, providing real-time insights into payment processing workflows for operations teams.
- Integrated data from multiple sources using **Power Query**, transforming raw transaction logs into a structured format suitable for reporting and analysis, improving data accessibility for business stakeholders.

ACHIEVEMENTS & CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California, Davis** (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
