+353 899706156 | hariramakrrish@gmail.com | [LinkedIn](#) | Stamp 1G — Eligible to work full-time in Ireland

## PROFESSIONAL EXPERIENCE

**SOFTWARE ENGINEER – HCL Technologies | Chennai, India**

**09/2021 – 01/2025 (3.5 Years)**

- Monitored and troubleshooted a **data center network** infrastructure, responding to alerts and managing tickets to ensure 99.9% availability across critical network devices.
- Executed fault isolation and resolution procedures for Layer 1-3 network issues, coordinating with **smart hands teams** and vendors to restore services efficiently, reducing average incident resolution time by **15%**.
- Managed the **network operations ticket queue**, acknowledging, tracking, and documenting all incidents, ensuring adherence to Service Level Agreements (SLAs) and categorizing events by severity and impact.
- Developed **Python scripts** for automating routine monitoring tasks and data collection, contributing to the creation of dashboards and metrics that improved operational efficiency by **10%**.
- Analyzed and escalated critical network events, maintaining clear and concise communication with internal stakeholders and cross-regional support teams to minimize operational impact.
- Documented and refined operational processes, including MOPs and SOPs for network changes, VLANs, and subnet configurations, supporting audit teams and ensuring accurate inventory management.

## SKILLS

**Networking Fundamentals** – IP addressing, VLANs, routing, switching, CLI.

**Network Monitoring Tools** – SolarWinds, Nagios, PRTG, CloudWatch, Splunk, Dynatrace.

**Ticketing Systems** – ServiceNow, Jira, Confluence.

**Troubleshooting** – Layer 1-3 diagnostics, physical network components (cables, optics), fault isolation.

**Scripting & Automation** – Python, shell scripting.

**Cloud & Containerization** – AWS (EC2, S3, Lambda), Docker.

**Databases & Data Analysis** – SQL (PostgreSQL, MySQL, Oracle), Power BI, DAX, Power Query, Tableau, R, pandas, NumPy.

## EDUCATION AND TRAINING

**MASTER OF SCIENCE in Data Analytics – National College of  
Ireland, Dublin**

**02/2026**

**BACHELOR OF ENGINEERING in Computer Science – SNS College  
of Technology, Coimbatore, India**

**01/2021**

## PROJECTS

### **Data Center Network Monitoring Dashboard**

- Developed a **Power BI dashboard** to visualize real-time network performance metrics, including latency, packet loss, and device health, for a large-scale data center environment.
- Integrated with multiple network monitoring tools using **Python scripts** to aggregate data, enabling proactive identification of potential issues and improving alert accuracy by **20%**.

- Designed and implemented **DAX measures** for calculating key performance indicators (KPIs) related to network availability and incident response times, providing actionable insights to operations teams.

#### **Automated Incident Response System**

- Built a Python-based system to automate the initial triage and response for common network alerts, reducing manual intervention by **30%**.
- Integrated with a **Jira ticketing system** to automatically create, update, and categorize incidents based on predefined rules and alert severity.
- Configured **AWS Lambda functions** to process incoming alerts from CloudWatch and execute diagnostic scripts, streamlining the fault isolation process for network engineers.

### **ACHIEVEMENTS & CERTIFICATIONS**

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California, Davis** (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
