PROFESSIONAL EXPERIENCE

SOFTWARE ENGINEER – HCL Technologies | Chennai, India **09/2021 – 01/2025 (3.5 Years)**

- Monitored **AWS and Azure cloud environments**, triaging security alerts and escalating critical cases to control partners, achieving a **95% SLA adherence** for incident response.
- Developed Python scripts to automate the analysis of **cloud logs** from **AWS and Azure**, reducing manual review time for security events by **40%**.
- Tuned existing **Splunk alerts** for cloud security events, significantly reducing false positives and improving the accuracy of threat detection by **30%**.
- Analyzed and reported on critical cloud vulnerabilities across **AWS, Azure, and GCP** environments, providing actionable insights to remediation teams.
- Maintained and updated comprehensive documentation for cloud security tooling and processes, ensuring clarity for incident response and operational teams.
- Collaborated with incident response teams to investigate suspicious **AI utilization** and potential jailbreak attempts within cloud infrastructure.

SKILLS

Cloud Platforms – AWS, Azure, GCP

Security Monitoring & SIEM – Splunk, Log Analytics, AWS CloudWatch, Azure Security Center, AWS Security Hub

Scripting & Automation – Python, Shell Scripting

Cloud Security Concepts – IaaS, PaaS, SaaS Security, Threat Analysis, Vulnerability Management, Incident Response

DevOps & Orchestration – Terraform, Ansible, Docker

Data Protection Frameworks – GDPR, PCI DSS, ISO 27001, NIST, CIS

Programming Languages – Java, Spring Boot, SQL

EDUCATION AND TRAINING

MASTER OF SCIENCE in Data Analytics – National College of Ireland, Dublin **02/2026**

BACHELOR OF ENGINEERING in Computer Science – SNS College of Technology, Coimbatore, India **01/2021**

PROJECTS

Cloud Security Monitoring and Alerting Platform

- Designed and implemented a centralized security monitoring solution for **AWS and Azure** environments using **Splunk** and **Python**.
- Developed custom dashboards within **Splunk** to visualize security events, track alert trends, and monitor system health, reducing mean time to detect by **25%**.

- Automated the initial triage of common security alerts, classifying events and generating standardized reports for escalation to the security operations center.

Vulnerability Assessment and Remediation Workflow

- Built a Python-based workflow to ingest vulnerability scan data from various cloud sources, including **AWS Inspector** and **Azure Vulnerability Assessment**.
- Integrated with ticketing systems to automatically create and assign vulnerability remediation tasks to relevant engineering teams, improving tracking efficiency.
- Developed reporting capabilities to track remediation progress against security standards like **CIS Benchmarks** and **NIST**.

ACHIEVEMENTS & CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California, Davis** (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
