PROFESSIONAL EXPERIENCE

SOFTWARE ENGINEER – HCL Technologies | Chennai, India

09/2021 – 01/2025 (3.5 Years)

- Developed and implemented core systems for **NPC AI** and **general gameplay** features for AAA titles, ensuring high-performance and well-documented code.
- Engineered **UI systems** for AAA games, focusing on delivering smooth performance and seamless integration across a variety of PC and console platforms.
- Managed **source control** and **bug reporting** workflows using industry-standard tools, contributing to team efficiency and code quality.
- Collaborated with art, animation, and design teams to provide **engineering support**, resolving technical challenges and ensuring smooth asset integration into game builds.
- Refactored and optimized **Python scripts** used for data pipelines and automated reporting, improving processing efficiency by **30%**.
- Contributed to the development of **REST APIs** using Java Spring Boot, facilitating seamless integrations between enterprise systems.

SKILLS

Core Languages – C++, Python, Java, C#

Game Development – Unreal Engine, Custom Engine, Gameplay Systems, AI Systems, 3D Mathematics, Game Jams, College Projects

Tools & Technologies – Git, Jenkins, Jira, Confluence, Splunk, Dynatrace, Docker, AWS (EC2, S3, Lambda, CloudWatch)

Databases & Scripting – SQL (PostgreSQL, MySQL, Oracle), Python Scripting

Methodologies – Agile Development, Scrum Ceremonies, Change Management, UAT Coordination

Engineering Practices – Profiling, Debugging Tools, Performance Optimization, Code Reviews, Incident Response

EDUCATION AND TRAINING

MASTER OF SCIENCE in Data Analytics – National College of Ireland, Dublin

02/2026

BACHELOR OF ENGINEERING in Computer Science – SNS College of Technology, Coimbatore, India

01/2021

PROJECTS

AI Behavior Tree System for Game Characters

- Designed and implemented a **behavior tree system** in C++ for controlling non-player character (NPC) AI, enabling complex decision-making logic.
- Integrated the behavior tree system with the **Unreal Engine gameplay framework**, allowing for dynamic AI responses to in-game events and player actions.

- Developed custom **debugging tools** to visualize AI decision paths and identify performance bottlenecks, reducing AI-related bugs by **20%**.

Automated Game Asset Pipeline

- Developed a **Python-based automation pipeline** to streamline the processing and integration of 3D art assets into the game engine.
- Integrated the pipeline with **CI/CD tools** like Jenkins to automate build processes and asset validation, reducing manual intervention time by **40%**.
- Created a **REST API** for triggering pipeline jobs and reporting status, enabling seamless integration with project management tools like Jira.

ACHIEVEMENTS & CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California, Davis** (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
