

HARIRAMAKRRISHNAN RAMACHANDRAN

+353 899706156 | hariramakrrish@gmail.com | [LinkedIn](#) | Stamp 1G — Eligible to work full-time in Ireland

PROFESSIONAL EXPERIENCE

SOFTWARE ENGINEER – HCL Technologies | Chennai, India

09/2021 – 01/2025 (3.5 Years)

- Developed and deployed **Python** scripts to automate data ingestion and transformation processes, reducing manual effort by **40%**.
- Engineered **Java Spring Boot** microservices for new feature development, enhancing system responsiveness and supporting over 10,000 daily transactions.
- Managed production incidents for enterprise applications, ensuring adherence to strict SLAs and achieving a **99.95%** system uptime through proactive monitoring with **Splunk** and **Dynatrace**.
- Designed and implemented complex **SQL** queries and stored procedures across **PostgreSQL** and **Oracle** databases for data validation and reporting, improving data accuracy by **15%**.
- Collaborated with cross-functional teams to define requirements and deliver features for a **payments operations dashboard**, focusing on transaction monitoring and reconciliation workflows.
- Integrated enterprise business systems using **REST APIs** and managed change control processes for system configurations, ensuring seamless operation across interconnected platforms.

SKILLS

Languages – Python, Java, SQL, R

Frameworks & Libraries – Spring Boot, pandas, NumPy, scikit-learn

Cloud & DevOps – AWS (EC2, S3, Lambda, CloudWatch), Docker, Jenkins, Git

Databases – PostgreSQL, MySQL, Oracle

Observability & Monitoring – Splunk, Dynatrace

BI & Data Analytics – Power BI, Tableau, DAX, Power Query, data modelling, data warehousing

Methodologies – Agile, Scrum

EDUCATION AND TRAINING

**MASTER OF SCIENCE in Data Analytics – National College of
Ireland, Dublin**

02/2026

**BACHELOR OF ENGINEERING in Computer Science – SNS College
of Technology, Coimbatore, India**

01/2021

PROJECTS

Real-Time Transaction Monitoring Dashboard

- Developed a **Python**-based backend service to process and aggregate transaction data from multiple sources for a financial services client.
- Built interactive visualizations and alerting mechanisms using **Power BI**, enabling operations teams to monitor payment flows and identify anomalies in near real-time.

- Implemented data validation checks and reconciliation logic within the data pipeline, reducing discrepancies by **20%** and improving reporting accuracy.

Automated Data Pipeline for ML Feature Engineering

- Designed and implemented an automated data pipeline using **Python** and **Pandas** to extract, transform, and load data from diverse enterprise systems.
- Engineered feature sets for machine learning models by performing complex data wrangling and feature selection, directly supporting predictive analytics use cases.
- Deployed the pipeline on **AWS** infrastructure, ensuring scalability and reliability for continuous data processing and feature generation, contributing to a **30%** faster model iteration cycle.

ACHIEVEMENTS & CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California, Davis** (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
