PROFESSIONAL EXPERIENCE

SOFTWARE ENGINEER – HCL Technologies | Chennai, India

09/2021 – 01/2025 (3.5 Years)

- Developed and maintained **Python** applications and data pipelines, ensuring adherence to **clean code** principles and comprehensive documentation.
- Implemented automated data validation and transformation logic using **Pandas** and **NumPy**, reducing data quality issues by **18%**.
- Supported the development of **PySpark** data processing jobs for large-scale datasets, collaborating with senior engineers to optimize performance.
- Debugged and resolved issues in batch and data-processing jobs, contributing to a **99.5%** job success rate.
- Participated in **code reviews**, implementing feedback to improve code quality and maintainability across the team's Python codebase.
- Collaborated with cross-functional teams including data engineers, QA, and DevOps to ensure smooth integration and deployment of new features.

SKILLS

Programming Languages – Python, PySpark, SQL, Java

Data Libraries & Frameworks – Pandas, NumPy, Scikit-learn

Cloud Platforms – AWS (EC2, S3, Lambda, CloudWatch)

Databases – PostgreSQL, MySQL, Oracle

Tools & Technologies – Docker, Git, Jenkins, Jira, Splunk, Dynatrace

Methodologies – Agile, Scrum, CI/CD

Domain Knowledge – Financial Services, Data Engineering, Application Development

EDUCATION AND TRAINING

**MASTER OF SCIENCE in Data Analytics – National College of
Ireland, Dublin**

02/2026

**BACHELOR OF ENGINEERING in Computer Science – SNS College
of Technology, Coimbatore, India**

01/2021

PROJECTS

Financial Transaction Monitoring System

- Developed Python scripts to automate the ingestion and validation of financial transaction data from various sources.
- Built data processing pipelines using **Pandas** and **SQL** to transform and aggregate transaction records for reconciliation workflows.
- Integrated with existing monitoring tools to provide real-time alerts for anomalies and potential data discrepancies, improving detection time by **30%**.

Data Engineering Pipeline for Analytics

- Designed and implemented a scalable data pipeline using **Python** and **PySpark** to process and prepare large datasets for analytical reporting.
- Developed data models and performed ETL operations for a data warehouse, enabling efficient querying for business intelligence dashboards.
- Collaborated with stakeholders to define data requirements and ensure the final dataset met analytical needs, reducing data preparation time for reports by **22%**.

ACHIEVEMENTS & CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
