PROFESSIONAL EXPERIENCE

SOFTWARE ENGINEER – HCL Technologies | Chennai, India

09/2021 – 01/2025 (3.5 Years)

- Developed and maintained **Java Spring Boot microservices** for core platform features, enhancing system responsiveness by **15%** through optimized REST API endpoints.
- Automated data validation and reporting processes using **Python scripts**, reducing manual effort for the financial-services operations dashboard by **20 hours** per week.
- Managed production incidents for enterprise applications, ensuring adherence to strict SLAs and resolving P1/P2 issues within defined timeframes using **Splunk** and **Dynatrace** for root cause analysis.
- Designed and implemented interactive **Power BI dashboards** to visualize key performance indicators for business stakeholders, enabling faster data-driven decision-making.
- Collaborated with cross-functional teams to support and integrate with enterprise systems, including coordinating change-control management and UAT for system configuration updates.
- Enhanced the reliability of a payments operations dashboard by implementing comprehensive monitoring and alerting for transaction flows, contributing to a **99.9%** uptime for critical financial operations.

SKILLS

Languages – Java, Python, SQL, R

Frameworks & Libraries – Spring Boot, pandas, NumPy, scikit-learn

Cloud & DevOps – AWS (EC2, S3, Lambda, CloudWatch), Docker, Jenkins, Git

Databases – PostgreSQL, MySQL, Oracle

BI & Data Visualization – Power BI, Tableau, DAX, Power Query

Monitoring & Observability – Splunk, Dynatrace

Methodologies & Tools – Agile, Scrum, Jira, Confluence

EDUCATION AND TRAINING

**MASTER OF SCIENCE in Data Analytics – National College of
Ireland, Dublin**

02/2026

**BACHELOR OF ENGINEERING in Computer Science – SNS College
of Technology, Coimbatore, India**

01/2021

PROJECTS

Real-Time Transaction Monitoring Dashboard

- Developed a **Java Spring Boot** application to ingest and process high-volume transaction data from multiple financial streams.
- Implemented asynchronous message processing using **Kafka** concepts, ensuring fault tolerance and near real-time updates for the dashboard.

- Created interactive visualizations in **Power BI** to display transaction status, identify bottlenecks, and provide operational insights for financial operations teams.

Automated Data Pipeline for Enterprise Reporting

- Built an automated **Python** data pipeline to extract, transform, and load data from disparate enterprise systems (ERP, CRM) into a data warehouse.
- Integrated with **PostgreSQL** and **Oracle** databases to retrieve source data and populate structured tables for reporting purposes.
- Scheduled and orchestrated pipeline jobs using **Jenkins**, ensuring timely delivery of data for daily business intelligence reports, reducing report generation time by **40%**.

ACHIEVEMENTS & CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California, Davis** (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
