PROFESSIONAL EXPERIENCE

SOFTWARE ENGINEER – HCL Technologies | Chennai, India

09/2021 – 01/2025 (3.5 Years)

- Managed and resolved P1/P2 incidents for enterprise applications, ensuring adherence to strict SLAs and reducing critical system downtime by **15%** through proactive monitoring using **Splunk** and **Dynatrace**.
- Developed and deployed **Python** scripts to automate ETL processes for financial data, improving data ingestion efficiency by **30%** and reducing manual processing errors.
- Configured and maintained **Java Spring Boot** REST APIs to support cross-system integrations for enterprise business systems, facilitating seamless data exchange with partner platforms.
- Designed and implemented interactive **Power BI** dashboards for operational reporting, consolidating data from disparate sources and providing actionable insights that led to a **10%** improvement in process efficiency.
- Coordinated UAT and change-control management for ERP system updates, ensuring smooth post-go-live transitions and minimal disruption to business operations across interconnected platforms.
- Collaborated with business analysts to gather requirements for a financial-services operations dashboard, translating needs into technical specifications for transaction monitoring and reconciliation workflows.

PROJECTS

Financial Transaction Monitoring Dashboard

- Developed a **Java Spring Boot** application to process and monitor financial transaction messages, enabling real-time alerting for failed or delayed payments.

- Integrated with **PostgreSQL** to store transaction data and audit trails, supporting regulatory compliance and reconciliation workflows for enterprise customers.
- Created interactive dashboards using **Power BI** to visualize transaction flows and operational metrics, reducing incident triage time by **20%**.

Automated Data Extraction and Reporting Pipeline

- Built a **Python**-based data pipeline to automate the extraction, transformation, and loading of operational data from multiple sources into a centralized data warehouse.
- Implemented automated report generation for key business stakeholders, delivering daily and weekly performance summaries and reducing manual reporting effort by **40%**.
- Configured **Jenkins** pipelines for CI/CD of the data extraction scripts, ensuring reliable and timely data delivery for downstream analytics and reporting.
