+353 899706156 | hariramakrrish@gmail.com | [LinkedIn](#) | Stamp 1G — Eligible to work full-time in Ireland

PROFESSIONAL EXPERIENCE

SOFTWARE ENGINEER – HCL Technologies | Chennai, India

09/2021 – 01/2025 (3.5 Years)

- Developed and maintained enterprise-wide **Databricks Lakehouse** solutions for data processing and analytics, supporting critical business operations.
- Built and optimized scalable **ETL/ELT pipelines** on AWS, ingesting and transforming financial data for downstream analytics and AI initiatives.
- Implemented data ingestion and transformation logic using **Delta Live Tables**, ensuring data quality and reliability across complex data workflows.
- Applied **Unity Catalog** features and IAM best practices to enforce security governance and granular access control across sensitive financial datasets.
- Scripted automated data validation and reconciliation checks using **Python**, reducing manual review effort by **40%** and enhancing data integrity.
- Collaborated within an **Agile/Scrum** framework to deliver iterative enhancements to data pipelines, participating in sprint planning, reviews, and retrospectives.

SKILLS

Data Engineering Platforms – Databricks, Delta Lake, Delta Live Tables, Unity Catalog

Cloud Platforms – AWS (S3, Glue, Lambda, EC2)

Programming Languages – Python, SQL, Spark

Data Processing & ETL – ETL, ELT, Data Pipelines, Data Modelling

Version Control & CI/CD – Git, Jenkins

Methodologies – Agile, Scrum

Security & Governance – IAM, Data Governance

EDUCATION AND TRAINING

**MASTER OF SCIENCE in Data Analytics – National College of
Ireland, Dublin**

02/2026

**BACHELOR OF ENGINEERING in Computer Science – SNS College
of Technology, Coimbatore, India**

01/2021

PROJECTS

Enterprise Data Lakehouse for Financial Analytics

- Architected and implemented a data lakehouse on **Databricks** using **Delta Lake**, consolidating disparate financial data sources.
- Developed Python-based ETL pipelines to ingest and transform transactional data, improving data availability for reporting by **30%**.

- Integrated with existing AWS infrastructure, ensuring secure data storage in **S3** and efficient processing via Spark on Databricks.

Real-time Transaction Monitoring System

- Engineered a data pipeline to process and monitor financial transaction flows in near real-time, utilizing **Python** and SQL.
- Implemented data quality checks and alerting mechanisms to identify anomalies and potential issues in transaction processing, reducing critical alerts by **20%**.
- Designed data models in PostgreSQL to support efficient querying for operational dashboards and reconciliation workflows.

ACHIEVEMENTS & CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California, Davis** (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
