

HARIRAMAKRRISHNAN RAMACHANDRAN

+353 899706156 | hariramakrrish@gmail.com | [LinkedIn](#) | Stamp 1G — Eligible to work full-time in Ireland

PROFESSIONAL EXPERIENCE

SOFTWARE ENGINEER – HCL Technologies | Chennai, India

09/2021 – 01/2025 (3.5 Years)

- Developed and deployed **Python** and **Java** microservices for detecting and responding to cybercrime, reducing incident response time by **30%**.
- Designed and implemented **agentic systems** and **AI-powered workflows** to automate the investigation of phishing and brand abuse patterns, increasing analysis throughput by **45%**.
- Built **SQL** queries and data pipelines to enrich cybercrime intelligence, translating findings into actionable signals for fraud prevention systems.
- Operated and monitored **distributed systems** on **AWS**, ensuring high availability and rapid response to production issues for critical security services, maintaining **99.95% uptime**.
- Engineered **REST APIs** and backend services to convert security research insights into scalable customer protections, facilitating faster deployment of new defense mechanisms.
- Managed end-to-end system lifecycles, including design, build, test, deploy, and performance improvement, for production cybercrime operator tooling.

SKILLS

Programming Languages – Python, Java, SQL, R, Bash

Cloud & Infrastructure – AWS (EC2, S3, Lambda, CloudWatch), Docker, Linux

Backend & APIs – Spring Boot, REST APIs, FastAPI, Flask, Microservices

Data Analysis & BI – Power BI, DAX, Tableau, Power Query, pandas, NumPy, scikit-learn, RStudio

DevOps & CI/CD – Jenkins, Git, Jira, Confluence, Agile/Scrum

Security & Cybercrime – Cybercrime Investigation, Agentic Systems, AI Workflows, LLM Tooling, Phishing Analysis, Brand Abuse Detection, Digital Identity Crime, Adversarial Research

EDUCATION AND TRAINING

**MASTER OF SCIENCE in Data Analytics – National College of
Ireland, Dublin**

02/2026

**BACHELOR OF ENGINEERING in Computer Science – SNS College
of Technology, Coimbatore, India**

01/2021

PROJECTS

Cybercrime Intelligence Automation Platform

- Developed a **Python**-based automation platform to ingest and analyze threat intelligence feeds related to online fraud and abuse.
- Integrated **FastAPI** for exposing enriched threat data via REST APIs, enabling downstream security services to consume intelligence programmatically.

- Designed and implemented data processing pipelines using **pandas** and **SQL**, reducing manual analysis time for cybercrime patterns by **60%**.

Real-Time Transaction Monitoring Dashboard

- Built a **Java Spring Boot** application to process and monitor financial transaction flows in near real-time, identifying anomalies and potential fraud.
- Created interactive dashboards using **Power BI** and **DAX** measures to visualize key operational metrics, enabling faster detection of suspicious activities for stakeholders.
- Implemented robust error handling and alerting mechanisms for failed transaction messages, supporting strict SLAs for a financial services client.

ACHIEVEMENTS & CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California, Davis** (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
