PROFESSIONAL EXPERIENCE

SOFTWARE ENGINEER – HCL Technologies | Chennai, India **09/2021 – 01/2025 (3.5 Years)**

- Developed and executed comprehensive test scripts for backend systems, tracing directly to complex requirements and acceptance criteria for a financial services client, ensuring explicit test coverage.
- Executed functional, regression, and integration tests for enterprise applications, identifying and documenting defects with a **15% reduction** in post-release critical issues through meticulous regression analysis.
- Interrogated underlying databases using **SQL** to extract test data and validate results, supporting backend system testing and integration verification across PostgreSQL and Oracle instances.
- Contributed to management reporting by providing key test metrics on planning, defect status, and execution progress, enabling informed decision-making for project milestones.
- Participated in defect triage discussions, effectively questioning development perceptions of severity and advocating for accurate bug classification, leading to a **20% improvement** in focused resolution efforts.
- Designed and implemented automation frameworks using **Java** and **REST Assured** for backend API testing, achieving **90% test automation coverage** for core payment processing workflows.

SKILLS

Testing Methodologies – Functional Testing, Regression Testing, Integration Testing, API Automation, Backend Testing, Test Planning, Test Scripting, Defect Triage, Acceptance Criteria Analysis

Programming Languages – Java, Python, SQL, JavaScript, TypeScript

Tools & Technologies – REST Assured, Cucumber, Jenkins, GitLab, Jira, Confluence, Git, PostgreSQL, Oracle, MySQL, Docker, AWS

Domain Knowledge – Fintech, Payments Domain, Payment Terminal Platforms, Device Management, Backend Processing Systems, Microservices Architectures

Cloud & Orchestration – Cloud-Native Deployments, Container Orchestration, Kubernetes

EDUCATION AND TRAINING

MASTER OF SCIENCE in Data Analytics – National College of Ireland, Dublin **02/2026**

BACHELOR OF ENGINEERING in Computer Science – SNS College of Technology, Coimbatore, India **01/2021**

PROJECTS

Payments Operations Dashboard Automation

- Developed automated test scripts using **Java** and **Selenium** to validate transaction monitoring and alerting functionalities on a financial services operations dashboard.
- Integrated automated tests into a **Jenkins** CI/CD pipeline, enabling continuous feedback on payment message processing and reconciliation workflows.

- Executed regression test suites against production-like environments, identifying and reporting defects that impacted transaction flow monitoring, contributing to a **99.8% uptime** SLA.

Device Configuration Service API Testing

- Designed and implemented API test automation for a device configuration service using **Python** and **Pytest**, focusing on terminal parameters and versioned configurations.
- Utilized **SQL** to set up prerequisite test data in a **PostgreSQL** database and verify data persistence post-API calls, ensuring data integrity for device settings.
- Achieved **85% API test coverage** for critical endpoints related to device parameter updates and version rollback, reducing manual testing effort by **40%**.

ACHIEVEMENTS & CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California, Davis** (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
