PROFESSIONAL EXPERIENCE

SOFTWARE ENGINEER – HCL Technologies | Chennai, India 09/2021 – 01/2025 (3.5 Years)

- Produced detailed fabrication drawings and cutting lists for structural steel components, adhering to specified **CE execution classes** and ensuring timely submission to meet project deadlines.
- Managed drawing office documentation and filing systems, maintaining strict adherence to **company procedures** and **CE certification** requirements to support regulatory compliance.
- Collaborated closely with structural engineers to evaluate design drawings, issuing **Requests for Information (RFIs)** for design team clarification on material grades and specifications.
- Prepared comprehensive material lists for fixings, fittings, and other components, directly supporting the purchasing department's procurement efforts and streamlining material ordering.
- Maintained a detailed **drawing register** and liaised with the design team to ensure all project documentation was current and accurately reflected project status, improving information flow by **20%**.
- Developed and automated the generation of **material ordering lists** using Python scripting, reducing manual compilation effort by **30%** and minimizing ordering errors.

SKILLS

3D Modelling Software – Tekla Structures, AutoCAD, SketchUp

Engineering Documentation – Fabrication Drawings, Site Erection Drawings, Cutting Lists, Material Lists, Drawing Register, RFIs

Project Management Tools – Microsoft Office Suite, Jira, Confluence, Document Management Systems (e.g., Zutec, DFM)

Technical Skills – CE Execution Classes, Bolt Specifications, Paint Systems, Manufacturing Processes

Programming & Automation – Python, SQL

General Skills – Prioritization, Problem Solving, Attention to Detail, Teamwork, Independent Work

EDUCATION AND TRAINING

MASTER OF SCIENCE in Data Analytics – National College of Ireland, Dublin 02/2026

BACHELOR OF ENGINEERING in Computer Science – SNS College of Technology, Coimbatore, India 01/2021

PROJECTS

Steel Fabrication Drawing Automation Platform

- Developed a Python application to automate the generation of fabrication drawings and cutting lists from structural design inputs, significantly reducing manual drafting time.
- Integrated with a mock **Tekla Structures** API to simulate data extraction for component dimensions and specifications, enabling end-to-end workflow testing.

- Implemented error-checking logic for material grades and bolt specifications, ensuring compliance with simulated project requirements and CE execution classes.

Operations Dashboard for Manufacturing Workflow

- Designed and built interactive dashboards using **Power BI** to visualize key performance indicators for a manufacturing environment, including production throughput and material utilization.
- Extracted and transformed data from simulated ERP and production logs using **Power Query**, performing data modelling to create a unified view of operational status.
- Published reports to stakeholders, providing actionable insights that supported improvements in process efficiency, contributing to a **15%** reduction in reporting lead time.

ACHIEVEMENTS & CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California, Davis** (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
