PROFESSIONAL EXPERIENCE

SOFTWARE ENGINEER – HCL Technologies | Chennai, India 09/2021 – 01/2025 (3.5 Years)

- Developed and maintained scalable, secure Python applications on **AWS Lambda**, contributing to a serverless architecture that processed over 10,000 requests daily.
- Designed and implemented RESTful APIs using **Python** and **Flask** for internal services, improving data retrieval efficiency by **30%**.
- Collaborated with cross-functional teams, including product managers and designers, to translate business requirements into technical solutions for cloud-based applications.
- Investigated and resolved complex software defects and performance bottlenecks in production environments, ensuring **99.9%** application uptime.
- Participated in code reviews and pair programming sessions, contributing to a culture of knowledge sharing and adherence to **clean code principles**.
- Automated data validation and ETL processes using **Python scripts**, reducing manual data handling time by **40%** and improving data accuracy.

SKILLS

Programming Languages – Python, JavaScript, TypeScript
Cloud Platforms – AWS (Lambda, API Gateway, DynamoDB, S3, EC2, CloudWatch)
Databases – DynamoDB, PostgreSQL, MySQL, Oracle
Development Tools – Git, Jenkins, Docker, Terraform, CloudFormation
Frameworks & Libraries – Flask, FastAPI, Spring Boot, pandas, NumPy, scikit-learn
Methodologies – Agile, Scrum, Object-Oriented Design, Clean Code Principles
Observability – Splunk, Dynatrace

EDUCATION AND TRAINING

MASTER OF SCIENCE in Data Analytics – National College of Ireland, Dublin 02/2026

BACHELOR OF ENGINEERING in Computer Science – SNS College of Technology, Coimbatore, India 01/2021

PROJECTS

Serverless Transaction Processing System

- Engineered a **serverless Python application** on AWS Lambda to process and validate financial transaction data, handling an average of 5,000 messages per hour.
- Integrated with **API Gateway** for secure request handling and utilized **DynamoDB** for high-throughput data storage, ensuring low-latency access.

- Implemented automated testing and monitoring using **CloudWatch**, achieving over **99.5%** success rate for transaction processing.

Automated Data Pipeline for Financial Operations

- Developed **Python scripts** to automate the extraction, transformation, and loading (ETL) of operational data from various sources into a centralized PostgreSQL database.
- Designed and implemented data validation checks within the pipeline to ensure data integrity and compliance with regulatory requirements, reducing data error rates by **25%**.
- Scheduled and managed pipeline execution using **Linux cron jobs** and integrated with **Jenkins** for CI/CD, streamlining data delivery to downstream reporting systems.

ACHIEVEMENTS & CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California, Davis** (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
