PROFESSIONAL EXPERIENCE

SOFTWARE ENGINEER – HCL Technologies | Chennai, India 09/2021 – 01/2025 (3.5 Years)

- Designed and implemented scalable backend services and **REST APIs** using **Java** and **Spring Boot**, supporting a high-volume **payments operations dashboard** for enterprise customers.
- Automated data processing and reporting workflows using **Python** scripts, reducing manual effort by **30%** and improving data pipeline reliability.
- Managed production incidents for enterprise applications, consistently meeting **SLA targets** through proactive monitoring with **Splunk** and **Dynatrace**.
- Developed and maintained robust data pipelines for a financial-services dashboard, ensuring data integrity and enabling real-time transaction monitoring and **reconciliation workflows**.
- Enhanced system security by implementing access controls and monitoring mechanisms for a **production environment** with strict audit trail requirements.
- Collaborated with cross-functional teams, including business analysts and operations, to gather requirements, coordinate **UAT**, and provide post-implementation support for enterprise systems.

SKILLS

Languages – Java, Python, SQL.

Frameworks & Libraries – Spring Boot, pandas, NumPy, scikit-learn.

Cloud & Infrastructure – AWS (EC2, S3, Lambda, CloudWatch), Docker, Linux.

Databases – PostgreSQL, MySQL, Oracle.

CI/CD & Tools – Jenkins, Git, Jira, Confluence, Splunk, Dynatrace.

Data Analytics & BI – Power BI, DAX, Tableau, R/RStudio, Data Warehousing, ETL.

APIs & Integrations – REST APIs, API Design, Microservices.

EDUCATION AND TRAINING

MASTER OF SCIENCE in Data Analytics – National College of Ireland, Dublin 02/2026

BACHELOR OF ENGINEERING in Computer Science – SNS College of Technology, Coimbatore, India 01/2021

PROJECTS

Real-Time Transaction Monitoring System

- Developed a **Java Spring Boot** backend service to ingest and process financial transaction messages in near real-time.
- Implemented robust error handling and alerting mechanisms using **AWS CloudWatch** for failed or delayed transactions, reducing critical incident response time by **20%**.

- Designed modular **API interfaces** for integrating with upstream and downstream systems, ensuring data consistency across the payments workflow.

Customer Interaction Data Ingestion Pipeline

- Built a scalable data pipeline using **Python** and **AWS Lambda** to capture and process customer interaction data from various communication channels.
- Integrated with messaging queues (e.g., **SQS**) to handle large volumes of incoming data, ensuring durability and reliable delivery to downstream storage.
- Focused on secure API design for data ingestion endpoints, protecting sensitive customer information and maintaining compliance with data privacy standards.

ACHIEVEMENTS & CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California, Davis** (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
