PROFESSIONAL EXPERIENCE

SOFTWARE ENGINEER – HCL Technologies | Chennai, India

09/2021 – 01/2025 (3.5 Years)

- Managed the uptime and maintenance of **UPS, generators, and electrical distribution** systems within a data center environment, responding to abnormal conditions to minimize recovery time.
- Operated and monitored critical data center facilities systems and equipment, ensuring adherence to operational parameters and promptly addressing deviations.
- Provided daily assistance to senior technicians by reading **blueprints/schematics** and conducting system tours to assess working order and identify maintenance needs.
- Supported the commissioning and startup of new **electrical equipment** and systems, integrating them into existing facilities infrastructure according to industry best practices.
- Performed inspections, maintenance, and repairs on various data center systems, including piping and non-critical mechanical components, ensuring operational reliability.
- Assisted in developing creative approaches to reduce operational costs while improving overall data center efficiency, focusing on energy consumption and system performance.

SKILLS

Electrical Systems – Electrical Distribution Systems, High Voltage (HV), Low Voltage (LV), Protection and Controls, Power Quality, UPS systems, Generators.

Data Center Operations – Facilities Management, Critical Operations, Control Room Operations, System Monitoring, Maintenance and Repair, Commissioning, Startup.

Technical Skills – Reading Blueprints, Schematics, Sequence of Operations, Material Handling, Working on Platforms and Ladders.

Software & Tools – Power BI, Tableau, Python, Java, SQL, Spring Boot, AWS, Docker, Linux, Git, Jenkins, Jira, Splunk, Dynatrace.

Project Management – Change Control Management, Incident Response, SLA Management, Regulatory Compliance, GDPR Awareness.

EDUCATION AND TRAINING

**MASTER OF SCIENCE in Data Analytics – National College of
Ireland, Dublin**

02/2026

**BACHELOR OF ENGINEERING in Computer Science – SNS College
of Technology, Coimbatore, India**

01/2021

PROJECTS

Data Center Operations Monitoring Dashboard

- Developed a **Power BI** dashboard to monitor key operational metrics for data center facilities, including power consumption, temperature, and equipment status.

- Integrated data from various control and monitoring systems using **Power Query** and DAX measures to provide real-time insights into system performance.
- Published interactive reports to business stakeholders, enabling proactive identification of potential issues and supporting efficiency improvement initiatives.

Automated Electrical System Diagnostic Tool

- Created a **Python** script to automate the analysis of diagnostic logs from electrical distribution systems, identifying common failure patterns.
- Implemented data validation checks using **SQL** queries against a PostgreSQL database storing historical system performance data.
- Reduced manual diagnostic time by **30%**, allowing technicians to focus on proactive maintenance and repair activities.

ACHIEVEMENTS & CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California, Davis** (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
