PROFESSIONAL EXPERIENCE

SOFTWARE ENGINEER – HCL Technologies | Chennai, India

09/2021 – 01/2025 (3.5 Years)

- Designed and implemented **distributed routing solutions** for a large-scale network infrastructure, abstracting complex hardware into manageable services.
- Developed and deployed **resilient, scalable software systems** within a cloud-native architecture, ensuring high availability and maintainability of production code.
- Managed project priorities and executed development tasks in a **self-directed manner**, delivering key components for a software-defined networking initiative.
- Collaborated with cross-functional teams to clarify technical requirements and proactively **resolved complex problems** across multiple system areas.
- Contributed to **production monitoring and documentation** standards, enhancing code quality and system observability for a distributed network platform.
- Automated data ingestion and processing pipelines using **Python scripts**, reducing manual effort by **30%** for report generation.

SKILLS

Languages – Go, Python, Java, SQL, R, TypeScript

Cloud & Containerisation – Kubernetes, Docker, AWS (EC2, S3, Lambda, CloudWatch)

Networking – Software Defined Networking (SDN), Internet Routing Technologies, Router/Switch Telemetry

Databases – PostgreSQL, MySQL, Oracle

Development Tools – Git, Jenkins, Jira, Confluence

Frameworks – Spring Boot, NestJS

Observability – Splunk, Dynatrace

EDUCATION AND TRAINING

**MASTER OF SCIENCE in Data Analytics – National College of
Ireland, Dublin**

02/2026

**BACHELOR OF ENGINEERING in Computer Science – SNS College
of Technology, Coimbatore, India**

01/2021

PROJECTS

Scalable Event-Driven Notification Service

- Engineered a **highly available notification service** using **Java Spring Boot** and **REST APIs** to handle asynchronous message processing.
- Integrated with **PostgreSQL** for persistent storage of notification logs and delivery status, managing a dataset of over 1 million records.

- Implemented **CI/CD pipelines** with **Jenkins** and **Git** for automated testing and deployment to **AWS EC2** instances.

Real-Time Network Telemetry Aggregator

- Developed a data aggregation service using **Python** and **Flask** to collect and process telemetry data from network devices.
- Designed and implemented data models for storing time-series network metrics in **MySQL**, supporting analytical queries.
- Created automated reports and visualizations using **Power BI** to monitor network performance and identify potential issues, improving incident detection time by **20%**.

ACHIEVEMENTS & CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California, Davis** (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
