

HARIRAMAKRRISHNAN RAMACHANDRAN

+353 899706156 | hariramakrrish@gmail.com | [LinkedIn](#) | Stamp 1G — Eligible to work full-time in Ireland

PROFESSIONAL EXPERIENCE

SOFTWARE ENGINEER – HCL Technologies | Chennai, India

09/2021 – 01/2025 (3.5 Years)

- Developed and deployed **Java Spring Boot microservices** for core platform features, improving request processing efficiency by **18%**.
- Automated data ingestion and transformation pipelines using **Python scripting** and **SQL**, reducing manual data loading time by **40%**.
- Managed and resolved P1/P2 incidents for enterprise applications in production environments, ensuring adherence to **99.9%** uptime SLAs through proactive monitoring with **Splunk** and **Dynatrace**.
- Contributed to the architectural design of scalable cloud-native systems on **AWS**, focusing on improving system resilience and deployment velocity.
- Implemented robust CI/CD pipelines using **Jenkins** and **Git**, enabling automated testing and faster release cycles for new software components.
- Collaborated with cross-functional teams to define technical requirements and translate them into actionable development tasks for new platform features, contributing to timely project completion.

SKILLS

Programming Languages – Java, Python, C++, Go

Cloud Platforms – Google Cloud Platform, AWS

Core Technologies – Distributed Computing, Large-Scale System Design, Data Structures, Algorithms, REST APIs, Docker

Databases – SQL, PostgreSQL, MySQL, Oracle

Development Tools – Git, Jenkins, Jira, Confluence, Linux

Monitoring & Observability – Splunk, Dynatrace, CloudWatch

EDUCATION AND TRAINING

**MASTER OF SCIENCE in Data Analytics – National College of
Ireland, Dublin**

02/2026

**BACHELOR OF ENGINEERING in Computer Science – SNS College
of Technology, Coimbatore, India**

01/2021

PROJECTS

Scalable Fleet Management System for Compute Instances

- Designed and implemented core backend services for managing a large fleet of compute instances, focusing on reliability and scalability.
- Developed automated health-check and self-healing mechanisms using **Python** and **AWS Lambda**, reducing manual intervention by **30%**.

- Integrated with internal APIs for resource provisioning and de-provisioning, ensuring efficient utilization of cloud infrastructure.

Real-Time Transaction Monitoring Dashboard

- Built a **Java Spring Boot** application to process and display real-time transaction data, enhancing operational visibility for financial workflows.
- Developed REST APIs for data ingestion and querying, supporting **100,000+** transactions per hour with sub-second latency.
- Configured alerts and notifications for anomalies in transaction processing using **Splunk**, improving incident response times by **25%**.

ACHIEVEMENTS & CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California, Davis** (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
