PROFESSIONAL EXPERIENCE

SOFTWARE ENGINEER – HCL Technologies | Chennai, India

09/2021 – 01/2025 (3.5 Years)

- Designed and implemented **Java Spring Boot** microservices for a global network traffic engineering platform, processing over **10TB** of daily routing data.
- Developed **Python** scripts to automate data validation and ETL processes for network performance metrics, reducing manual processing time by **40%**.
- Managed incident response and root cause analysis for critical production systems, resolving P1/P2 issues within defined SLAs and improving system stability by **15%**.
- Contributed to the design and implementation of large-scale, real-time software systems for network load balancing and traffic optimization.
- Optimized **SQL** queries against large datasets in **PostgreSQL** and **Oracle** databases, improving report generation speed by an average of **30%**.
- Participated in code reviews and design discussions, ensuring adherence to best practices for code quality, testability, and performance.

SKILLS

Languages – Java, Python, SQL, C++

Frameworks/Libraries – Spring Boot, pandas, NumPy, scikit-learn

Cloud/Infrastructure – AWS (EC2, S3, Lambda, CloudWatch), Docker, Linux

Databases – PostgreSQL, MySQL, Oracle

Tools/Platforms – Jenkins, Git, Jira, Confluence, Splunk, Dynatrace

Concepts – Data Structures, Algorithms, Network Architecture Design, Performance Optimization, Distributed Computing, Real-Time Systems

EDUCATION AND TRAINING

**MASTER OF SCIENCE in Data Analytics – National College of
Ireland, Dublin**

02/2026

**BACHELOR OF ENGINEERING in Computer Science – SNS College
of Technology, Coimbatore, India**

01/2021

PROJECTS

Real-Time Network Traffic Management System

- Developed a **Java Spring Boot** backend service to ingest and process real-time network traffic data for load balancing.
- Implemented REST APIs for configuring traffic routing rules and monitoring network performance metrics, integrated with **AWS** infrastructure.

- Engineered data pipelines using **Python** to transform raw network logs into actionable insights for performance analysis, achieving **99.9%** data accuracy.

Scalable Network Monitoring & Alerting Dashboard

- Built an interactive dashboard using **Power BI** to visualize network traffic patterns and system health for a global infrastructure.
- Designed and implemented **DAX** measures for key performance indicators (KPIs) related to network latency and throughput, enabling faster issue detection.
- Integrated data from multiple sources via **Power Query** and SQL, supporting over **500** concurrent users with critical operational visibility.

ACHIEVEMENTS & CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California, Davis** (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
