PROFESSIONAL EXPERIENCE

SOFTWARE ENGINEER – HCL Technologies | Chennai, India 09/2021 – 01/2025 (3.5 Years)

- Provided **24/7 production support** for critical enterprise applications, resolving P1/P2 incidents and maintaining SLAs across distributed systems utilizing **Splunk** and **Dynatrace** for monitoring.
- Automated data validation and reporting processes using **Python scripting**, reducing manual effort by **30%** and improving data pipeline efficiency.
- Developed and maintained **Java Spring Boot** REST APIs for inter-service communication, contributing to the expansion of a microservices architecture.
- Managed complex SQL queries and schema modifications across **PostgreSQL** and **Oracle** databases to support application features and data integration efforts.
- Contributed to a financial-services operations dashboard by implementing features for **transaction monitoring** and reconciliation workflows, ensuring data integrity and audit trail compliance.
- Participated in Agile ceremonies, code reviews, and CI/CD pipeline management using **Jenkins** and **Git**, ensuring consistent delivery of high-quality software.

SKILLS

Core Languages – Java, Python, SQL, R

Frameworks & Libraries – Spring Boot, pandas, NumPy, scikit-learn, Flask, FastAPI, NestJS

Cloud & Infrastructure – AWS (EC2, S3, Lambda, CloudWatch), Docker, Linux, Kubernetes

Databases – PostgreSQL, MySQL, Oracle

CI/CD & Tools – Jenkins, Git, Jira, Confluence, Splunk, Dynatrace

BI & Data Analytics – Power BI, Tableau, DAX, Power Query, Data Modelling

Networking & Protocols – TCP/IP, HTTP, REST APIs, Traceroute, MTR, tcpdump, Wireshark

EDUCATION AND TRAINING

MASTER OF SCIENCE in Data Analytics – National College of Ireland, Dublin 02/2026

BACHELOR OF ENGINEERING in Computer Science – SNS College of Technology, Coimbatore, India 01/2021

PROJECTS

Financial Transaction Monitoring Dashboard

- Developed a Java Spring Boot-based dashboard for a financial services client to monitor real-time transaction flows and operational alerts.
- Implemented automated anomaly detection for failed payment messages and reconciliation workflows, reducing manual review by **25%**.

- Integrated with PostgreSQL to store and retrieve transaction data, ensuring historical accuracy for audit trails and compliance reporting.

Distributed Systems Performance Analysis Toolkit

- Created a Python toolkit to analyze network packet captures (using **tcpdump**) and traceroute data for diagnosing latency issues in distributed applications.
- Developed scripts to simulate network conditions and generate artificial traffic patterns for load testing critical services.
- Built custom dashboards using **Power BI** to visualize network performance metrics and identify root causes of packet loss and latency spikes.

ACHIEVEMENTS & CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California, Davis** (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
