PROFESSIONAL EXPERIENCE

SOFTWARE ENGINEER – HCL Technologies | Chennai, India

09/2021 – 01/2025 (3.5 Years)

- Developed and scaled **ETL pipelines** using **Python** and **SQL** to integrate disparate data sources into a unified data warehouse, improving data availability by **30%**.
- Engineered and maintained **high-performance APIs** with **FastAPI**, facilitating data insights for internal stakeholders and reducing data retrieval latency by **40%**.
- Led data transformation initiatives using **dbt**, structuring and modularizing the data warehouse for efficient analytical querying, resulting in a **25%** faster report generation.
- Optimized data structures and schemas in a **cloud-based data warehouse**, ensuring rapid query performance for analytical and operational use cases.
- Automated data validation and cleansing processes with **Python scripts**, guaranteeing data integrity and security standards met **99.9%** accuracy.
- Contributed to production support for enterprise applications, managing SLAs and responding to P1/P2 incidents within a **Linux** and **AWS** environment.

SKILLS

Data Engineering – ETL, ELT, dbt, Data Modelling, Data Warehousing, API Development, Data Validation, Data Cleansing, Cloud Data Warehousing, GCP, BigQuery

Programming Languages – Python, SQL, R

Frameworks & Libraries – FastAPI, pandas, NumPy, scikit-learn

Databases – PostgreSQL, MySQL, Oracle

Cloud & DevOps – AWS, Docker, CI/CD, Jenkins, Git, Linux

BI & Analytics – Power BI, Tableau, DAX, Power Query

Methodologies – Agile, Scrum

EDUCATION AND TRAINING

**MASTER OF SCIENCE in Data Analytics – National College of
Ireland, Dublin**

02/2026

**BACHELOR OF ENGINEERING in Computer Science – SNS College
of Technology, Coimbatore, India**

01/2021

PROJECTS

Scalable Data Pipeline for Customer Analytics

- Designed and implemented a scalable **ETL pipeline** using **Python** and **SQL** on **AWS** to ingest and process customer interaction data.
- Developed transformation logic with **dbt** to structure raw data into a dimensional model suitable for business intelligence reporting.

- Integrated the pipeline with a **FastAPI** service to serve aggregated metrics for an internal analytics dashboard, improving data access speed by **35%**.

Real-time Transaction Monitoring Dashboard

- Built a dashboard using **Power BI** to visualize real-time transaction flows and identify anomalies within financial operations.
- Wrote complex **SQL** queries against PostgreSQL to extract and aggregate transaction data for analysis and reporting.
- Automated data refresh processes using scheduled Python scripts and integrated with enterprise systems via REST APIs, ensuring timely updates for stakeholders.

ACHIEVEMENTS & CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California, Davis** (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
