PROFESSIONAL EXPERIENCE

SOFTWARE ENGINEER – HCL Technologies | Chennai, India 09/2021 – 01/2025 (3.5 Years)

- Developed a responsive frontend web application using **React** and **TypeScript**, implementing dynamic components and state management with **Zustand** to enhance user interaction on the quantum development platform.
- Integrated frontend components with backend services via **RESTful APIs**, utilizing **Apollo Client** to fetch and manage quantum simulation data, thereby improving data retrieval efficiency by **30%**.
- Collaborated with scientists and product managers to translate complex requirements into actionable software tasks, contributing to the implementation and testing of new product features within an Agile framework.
- Refactored and optimized existing UI code for the quantum programming tools, improving loading times by **20%** and enhancing overall application performance.
- Managed code versions and collaborated on feature development using **Git**, participating in code reviews to maintain high standards of software quality and adherence to established development practices.
- Contributed to the implementation of a new UI component library using **Chakra UI**, ensuring consistent design language and accessibility across the frontend application.

SKILLS

Frontend Technologies – React, TypeScript, JavaScript, HTML, CSS, Next.js, Chakra UI, React-ace

State Management – Zustand, Redux, Context API

API Integration – RESTful API, Apollo Client

Development Tools & Practices – Git, SVN, Agile Methodology, Jenkins, Docker, Vercel

Cloud Services – AWS (EC2, S3, Lambda, CloudWatch)

Backend Considerations – Node.js, NestJS

Data Analytics & BI – Power BI, Tableau, DAX, R, Python (pandas, NumPy, scikit-learn)

EDUCATION AND TRAINING

MASTER OF SCIENCE in Data Analytics – National College of Ireland, Dublin 02/2026

BACHELOR OF ENGINEERING in Computer Science – SNS College of Technology, Coimbatore, India 01/2021

PROJECTS

Quantum Development Tooling Frontend

- Engineered a user interface for a quantum development environment using **React** and **TypeScript**, focusing on intuitive navigation and data visualization.
- Implemented state management with **Zustand** to handle complex application states and ensure smooth user experience during quantum algorithm design.

- Integrated with backend APIs using **Apollo Client** to display simulation results and quantum circuit parameters, supporting data-driven insights for researchers.

Financial Services Operations Dashboard Enhancement

- Enhanced a payments operations dashboard by developing new modules for **transaction monitoring** and **reconciliation workflows** using Java Spring Boot and PostgreSQL.
- Automated report generation for key operational metrics using Python scripting, reducing manual reporting effort by **40%**.
- Supported production environments by monitoring application health with **Splunk** and responding to critical incidents, maintaining **99.95%** uptime for financial transaction processing.

ACHIEVEMENTS & CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California, Davis** (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
