

HARIRAMAKRRISHNAN RAMACHANDRAN

+353 899706156 | hariramakrrish@gmail.com | [LinkedIn](#) | Stamp 1G — Eligible to work full-time in Ireland

PROFESSIONAL EXPERIENCE

SOFTWARE ENGINEER – HCL Technologies | Chennai, India

09/2021 – 01/2025 (3.5 Years)

- Designed and deployed **machine learning models** for anomaly detection and operational forecasting, reducing critical incident response times by **30%**.
- Developed and maintained scalable **data models** and telemetry structures supporting AI initiatives on a global remote infrastructure.
- Integrated **AI capabilities** into existing systems and APIs, enhancing automation and predictive insights for production environments.
- Monitored and improved **production AI system** performance, reliability, and scalability, addressing model drift and changing operational conditions.
- Collaborated with engineering and data teams to translate operational challenges into data-driven solutions, improving efficiency by an average of **18%**.
- Implemented **Python scripts** for data pipelines and scheduled reporting, automating ETL processes and reducing manual effort by **40%**.

SKILLS

AI/ML – PyTorch, TensorFlow, Scikit-Learn, Anomaly Detection, Predictive Maintenance, Operational Forecasting

Data Architecture – Time-Series Data, Data Models, Telemetry Structures, Data Warehousing

Programming – Python, JavaScript, TypeScript, Node.js

Deployment & Operations – Docker, Containerized Deployment, Production AI Systems, Model Drift, API Integration, CI/CD, Jenkins

Cloud & Infrastructure – AWS, EC2, S3, Lambda, CloudWatch

Databases – PostgreSQL, MySQL, Oracle, SQL

Analytics & Visualization – Power BI, Tableau, DAX, Power Query, R

EDUCATION AND TRAINING

**MASTER OF SCIENCE in Data Analytics – National College of
Ireland, Dublin**

02/2026

**BACHELOR OF ENGINEERING in Computer Science – SNS College
of Technology, Coimbatore, India**

01/2021

PROJECTS

Real-Time Telemetry Analysis Platform

- Developed a Python-based pipeline to ingest and process high-volume **IoT-style telemetry data** from distributed devices.
- Implemented **anomaly detection algorithms** using Scikit-Learn to identify system irregularities, reducing false positive alerts by **25%**.

- Designed and deployed the system using **Docker containers** on AWS infrastructure, ensuring scalable and reliable data processing.

Operational Efficiency Dashboard

- Built interactive dashboards in **Power BI** to visualize key performance indicators for large-scale infrastructure operations.
- Created complex **DAX measures** and data models to derive actionable insights from time-series operational data, improving reporting efficiency by **35%**.
- Integrated data from multiple sources via **Power Query**, enabling comprehensive monitoring and performance analysis for stakeholders.

ACHIEVEMENTS & CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California, Davis** (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
