PROFESSIONAL EXPERIENCE

SOFTWARE ENGINEER – HCL Technologies | Chennai, India

09/2021 – 01/2025 (3.5 Years)

- Developed and maintained **Java Spring Boot** microservices, implementing **REST APIs** for internal system integrations and reducing API latency by **18%**.
- Engineered **Python** scripts to automate data extraction, transformation, and loading (ETL) processes for enterprise reporting, accelerating data availability by **30%**.
- Managed production support for enterprise applications, responding to P1/P2 incidents and ensuring **99.9% uptime** for critical financial operations dashboards through proactive monitoring with **Splunk** and **Dynatrace**.
- Designed and implemented **AWS** data warehousing solutions using **S3** and **EMR**, facilitating scalable data ingestion and processing for large datasets.
- Collaborated with cross-functional teams to gather requirements and support User Acceptance Testing (UAT) for system configuration updates, ensuring successful change management for interconnected ERP and operational platforms.
- Created interactive **Power BI** dashboards and reports, translating complex data models into actionable business intelligence for stakeholders, improving data-driven decision-making across departments.

SKILLS

Cloud Platforms – AWS (EC2, S3, Lambda, CloudWatch, EMR), Docker

Programming Languages – Java, Python, SQL, R, Scala

Frameworks & Libraries – Spring Boot, PySpark, pandas, NumPy, scikit-learn, Apache Airflow

Databases & Data Warehousing – PostgreSQL, MySQL, Oracle, NoSQL (DynamoDB), Data Modeling, Data Lake, Data Security

DevOps & CI/CD – Jenkins, Git, Artifactory, Yaml, Maven, Infrastructure as Code (Terraform, CloudFormation)

Big Data Technologies – Spark, EMR, Athena, Databricks, Parquet, ORC, Avro, Delta Lake, Iceberg

BI & Data Visualization – Power BI, Tableau, DAX, Power Query, RStudio

EDUCATION AND TRAINING

**MASTER OF SCIENCE in Data Analytics – National College of
Ireland, Dublin**

02/2026

**BACHELOR OF ENGINEERING in Computer Science – SNS College
of Technology, Coimbatore, India**

01/2021

PROJECTS

Scalable Data Ingestion Pipeline for Financial Analytics

- Developed a **Python**-based data pipeline using **AWS Lambda** and **S3** to ingest and process high-volume transaction data from disparate sources.
- Implemented data transformation logic using **PySpark** on **EMR**, structuring data into a **Data Lake** format (Parquet) and optimizing for analytical queries, reducing processing time by **25%**.

- Integrated the pipeline with **Jenkins** for automated CI/CD deployment, ensuring reliable and repeatable data processing for downstream business intelligence dashboards.

Real-Time Operations Monitoring Dashboard

- Built a dynamic **Power BI** dashboard to visualize key operational metrics and transaction flows for financial services, providing real-time insights into system performance.
- Wrote complex **DAX** measures and queries to aggregate data from multiple sources, enabling detailed drill-down analysis and support for **GDPR**-aware audit trails.
- Collaborated with business analysts to refine reporting requirements and ensure the dashboard accurately reflected critical reconciliation workflows and payment statuses.

ACHIEVEMENTS & CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California, Davis** (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
