PROFESSIONAL EXPERIENCE

SOFTWARE ENGINEER – HCL Technologies | Chennai, India **09/2021 – 01/2025 (3.5 Years)**

- Provided technical support for enterprise applications, managing SLAs and responding to P1/P2 incidents using **Splunk** and **Dynatrace**, achieving 99.9% service availability.
- Automated data pipeline and reporting tasks using **Python scripting**, reducing manual processing time for financial operations by an average of **4 hours** per week.
- Developed and maintained REST APIs using **Java Spring Boot** for cross-system integrations, supporting new feature rollouts and enhancing data flow efficiency by **15%**.
- Managed production environments with strict audit trails and regulatory awareness, supporting a financial-services client's operations dashboard and transaction monitoring workflows.
- Supported and integrated with enterprise business systems, including ERP modules, managing change-control processes and coordinating UAT for system configuration updates.
- Designed and deployed interactive dashboards and data visualizations in **Power BI** for business stakeholders, translating complex data into actionable insights and improving report generation speed by **30%**.

SKILLS

Operating Systems – Linux, Mac OS X, Windows

Cloud & Virtualization – AWS (EC2, S3, Lambda, CloudWatch), Docker

Programming & Scripting – Python, Java, Spring Boot, REST APIs, Shell Scripting, PowerShell

Databases & Data Warehousing – SQL, PostgreSQL, MySQL, Oracle, Data Modelling, Power Query

Monitoring & Observability – Splunk, Dynatrace, CloudWatch

CI/CD & Version Control – Jenkins, Git

Business Systems & Support – ERP, Active Directory, SSO, LDAP, Firewalls, DNS Servers, Authentication Protocols, Identity Access Management

EDUCATION AND TRAINING

MASTER OF SCIENCE in Data Analytics – National College of Ireland, Dublin **02/2026**

BACHELOR OF ENGINEERING in Computer Science – SNS College of Technology, Coimbatore, India **01/2021**

PROJECTS

Financial Services Operations Dashboard Enhancement

- Developed new Java Spring Boot microservices to process and normalize inbound transaction messages for a payments operations dashboard, improving data ingestion rates by **20%**.
- Implemented real-time alerting mechanisms using Python and Splunk queries for failed payment messages, reducing critical incident response time by **30%**.

- Collaborated with business analysts to refine reconciliation workflows and enhance audit trail capabilities, ensuring compliance with GDPR requirements.

Customer Support Case Management System

- Engineered a **Python**-based backend service to manage and categorize customer support tickets, integrating with existing ticketing systems via REST APIs.
- Designed a **Power BI** dashboard to visualize key support metrics, including case volume, resolution times, and customer satisfaction trends, providing insights for service improvement.
- Configured **Linux** servers and utilized **shell scripting** for automated log analysis and system health monitoring of the support platform.

ACHIEVEMENTS & CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California, Davis** (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
