+353 899706156 | hariramakrrish@gmail.com | [LinkedIn](#) | Stamp 1G — Eligible to work full-time in Ireland

PROFESSIONAL EXPERIENCE

SOFTWARE ENGINEER – HCL Technologies | Chennai, India **09/2021 – 01/2025 (3.5 Years)**

- Developed and maintained **Python** scripts for automating data ingestion and transformation tasks, reducing manual processing time by **30%**.
- Contributed to the enhancement of enterprise **Java Spring Boot** applications by implementing new features and resolving critical bugs in production services.
- Managed the production support for financial-services dashboards, including **incident response** for P1/P2 issues and SLA adherence, ensuring **99.9%** system uptime.
- Designed and deployed **ML models** into production environments, focusing on reliable inference services and data pipelines, under the guidance of senior engineers.
- Collaborated with data scientists to translate machine learning models into scalable **production solutions**, ensuring seamless integration with existing systems.
- Implemented comprehensive testing strategies and maintained detailed documentation for AI systems, adhering to strict **version control** and code review processes.

SKILLS

AI/ML Engineering – MLOps, Model Deployment, Inference Services, Feature Engineering, Data Preparation, Responsible AI, Agentic Systems, LLM-based Systems

Programming Languages – Python, Java, SQL, R

Frameworks & Libraries – Spring Boot, pandas, NumPy, scikit-learn, Flask, FastAPI

Cloud & DevOps – AWS (EC2, S3, Lambda, CloudWatch), Docker, Jenkins, Git, Kubernetes

Databases – PostgreSQL, MySQL, Oracle

Observability & Monitoring – Splunk, Dynatrace, CloudWatch

BI & Data Visualization – Power BI, Tableau, DAX, Power Query

EDUCATION AND TRAINING

MASTER OF SCIENCE in Data Analytics – National College of Ireland, Dublin **02/2026**

BACHELOR OF ENGINEERING in Computer Science – SNS College of Technology, Coimbatore, India **01/2021**

PROJECTS

Real-Time Transaction Monitoring System

- Developed a **Java Spring Boot** microservice to process and monitor financial transaction messages in near real-time, ensuring data integrity and adherence to operational SLAs.
- Integrated with a **PostgreSQL** database for storing transaction logs and implemented **REST APIs** for querying transaction status and generating operational reports.

- Deployed the service on **AWS EC2** instances using **Docker** containers, managed through **Jenkins** CI/CD pipelines for automated build and deployment.

Automated Data Pipeline for ML Feature Engineering

- Built an automated data pipeline using **Python** and **pandas** to extract, transform, and load data from multiple sources for ML model training.
- Engineered relevant features for predictive models, improving model accuracy by an estimated **15%** in offline evaluations.
- Collaborated with data scientists to integrate the pipeline with model training scripts and ensure timely data availability for experimentation workflows.

ACHIEVEMENTS & CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California, Davis** (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
