PROJECTS

Enterprise Financial Transaction Monitoring Dashboard

- Developed **Java Spring Boot** backend services to process and aggregate financial transaction data from multiple sources for a client-facing dashboard.
- Implemented **PostgreSQL** schema changes and optimized queries to support real-time transaction flow monitoring and anomaly detection.
- Integrated with **Splunk** for log aggregation and alerting, ensuring high availability and rapid incident response for critical financial operations.

Scalable E-commerce Recommendation Engine

- Designed and built a **Python**-based recommendation engine utilizing **scikit-learn** models to personalize user experiences on an e-commerce platform.
- Developed RESTful APIs using **FastAPI** for seamless integration with the front-end application, handling over 50,000 requests per hour.
- Deployed the service on **AWS EC2** instances managed via **Docker** containers, ensuring scalability and reliability for peak traffic periods.
