

HARIRAMAKRRISHNAN RAMACHANDRAN

+353 899706156 | hariramakrrish@gmail.com | [LinkedIn](#) | Stamp 1G — Eligible to work full-time in Ireland

PROFESSIONAL EXPERIENCE

SOFTWARE ENGINEER – HCL Technologies | Chennai, India 09/2021 – 01/2025 (3.5 Years)

- Developed and maintained **Python** backend services and **REST APIs** to support critical business systems, improving data accessibility for finance teams by **30%**.
- Built integration components connecting to **streaming platforms** and **distributed systems**, enabling real-time data flow for financial operations.
- Enhanced **REST APIs** deployed in **containerized environments** using **Docker** and **AWS**, facilitating secure user access to central datasets.
- Implemented distributed workflows for complex business processes, coordinating operations across multiple financial systems and reducing manual intervention by **25%**.
- Contributed to the development of a **Python**-based data architecture for centralizing data definitions, aligning with data governance objectives and stakeholder requirements.
- Supported production systems by integrating comprehensive testing automation and adopting **DevOps** practices, leading to a **15%** reduction in critical incidents.

SKILLS

Languages – Python, Java, SQL, R, DAX

Frameworks & Libraries – Spring Boot, Flask, FastAPI, pandas, NumPy, scikit-learn, Angular, React

Cloud & DevOps – AWS (EC2, S3, Lambda, CloudWatch), Docker, Jenkins, Git, Linux, Kubernetes

Databases – PostgreSQL, MySQL, Oracle

Data & BI – Power BI, Tableau, Power Query, Data Warehousing, Data Modelling, ETL

Systems & Protocols – REST APIs, Kafka, Distributed Systems, Event-Based Systems

Financial Domain – Portfolio Accounting Technology, Fund Accounting, Back Office Operations, Transaction Monitoring, Reconciliation Workflows

EDUCATION AND TRAINING

MASTER OF SCIENCE in Data Analytics – National College of Ireland, Dublin 02/2026

BACHELOR OF ENGINEERING in Computer Science – SNS College of Technology, Coimbatore, India 01/2021

PROJECTS

Real-Time Transaction Monitoring Dashboard

- Developed a **Python**-based backend service to ingest and process high-volume financial transaction messages from multiple sources.
- Built **REST APIs** to expose processed transaction data for a monitoring dashboard, enabling operations teams to track payment flows in near real-time.

- Integrated with **PostgreSQL** for data storage and utilized **AWS Lambda** for scalable processing, ensuring high availability for critical financial operations.

Distributed Workflow Orchestration Engine

- Designed and implemented a distributed workflow engine using **Python** and **Flask** to manage complex, multi-step business processes for enterprise systems.
- Integrated the engine with **Kafka** for asynchronous communication between distributed components and with **Docker** for containerized deployment.
- Implemented robust error handling and retry mechanisms, improving the success rate of critical business process execution by **20%**.

ACHIEVEMENTS & CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California, Davis** (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
