PROFESSIONAL EXPERIENCE

SOFTWARE ENGINEER – HCL Technologies | Chennai, India

09/2021 – 01/2025 (3.5 Years)

- Managed incident response and SLA adherence for enterprise Java applications, resolving P1/P2 incidents and reducing critical downtime by **15%** through proactive monitoring with **Splunk** and **Dynatrace**.
- Developed automated data pipelines using **Python** and **SQL** to extract, transform, and load financial transaction data, improving reporting efficiency by **30%**.
- Enhanced a financial-services operations dashboard by implementing new features in **Java Spring Boot** and developing **REST APIs**, supporting transaction monitoring and operational alerting.
- Designed and deployed interactive dashboards and complex DAX measures in **Power BI** for business stakeholders, translating raw data into actionable insights and improving data-driven decision-making by an estimated **20%**.
- Coordinated change management processes for ERP system updates, including UAT support and post-go-live monitoring, ensuring seamless integration across interconnected business platforms.
- Refactored relational database queries in **PostgreSQL** and implemented strategic indexing, reducing analytical report execution times by **34%** across core ERP database clusters.

SKILLS

Programming Languages – Python, Java, SQL, R

Frameworks & Libraries – Spring Boot, pandas, NumPy, scikit-learn

Databases – PostgreSQL, MySQL, Oracle

Cloud & DevOps – AWS (EC2, S3, Lambda, CloudWatch), Docker, Jenkins, Git

BI & Data Visualization – Power BI, Tableau, DAX, Power Query

Tools & Platforms – Splunk, Dynatrace, Jira, Confluence

Methodologies – Agile, Scrum, Data Warehousing, ETL

EDUCATION AND TRAINING

**MASTER OF SCIENCE in Data Analytics – National College of
Ireland, Dublin**

02/2026

**BACHELOR OF ENGINEERING in Computer Science – SNS College
of Technology, Coimbatore, India**

01/2021

PROJECTS

Payments Transaction Monitoring Dashboard (HCL Technologies)

- Developed and maintained a critical dashboard for a financial-services client, providing real-time visibility into transaction flows and operational alerting for failed messages.
- Implemented automated reconciliation workflows using **Python** scripting and **SQL** queries against **PostgreSQL**, reducing manual reconciliation effort by **40%**.

- Ensured production environment stability and compliance with regulatory awareness and audit trail requirements, supporting P1 incident resolution within strict SLAs.

Enterprise Operations Analytics Platform

- Built a comprehensive analytics platform integrating data from ERP and operational systems, enabling cross-system analysis and KPI tracking.
- Created interactive dashboards in **Power BI** with complex **DAX** measures and efficient data models, visualizing key business metrics for executive review.
- Automated data ingestion and transformation processes using **Python** and **Power Query**, streamlining ETL operations and ensuring data accuracy for reporting.

ACHIEVEMENTS & CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California, Davis** (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
