PROFESSIONAL EXPERIENCE

SOFTWARE ENGINEER – HCL Technologies | Chennai, India 09/2021 – 01/2025 (3.5 Years)

- Provided technical leadership on complex power systems projects, translating client requirements into actionable engineering deliverables and ensuring adherence to project timelines and budgets.
- Conducted in-depth power systems analysis, including short circuit, power flow, and protection coordination studies, to assess system performance and identify potential issues.
- Prepared detailed technical and non-technical reports for clients, clearly communicating findings, recommendations, and project status updates.
- Collaborated with cross-functional teams to support enterprise business systems, managing change control processes and coordinating User Acceptance Testing (UAT) for system updates.
- Developed Python scripts to automate data pipelines and scheduled reporting, improving efficiency and accuracy of data processing for financial services operations.
- Managed production support for enterprise applications using **Splunk** and **Dynatrace**, responding to P1/P2 incidents and maintaining service level agreements (SLAs) for critical systems.

SKILLS

Power Systems Analysis – Short Circuit Studies, Power Flow Analysis, Protection Coordination, Arc Flash Studies, Redundancy Analysis, Grid Connection Analysis, Transient Stability, Harmonics, Flicker, Transformer Inrush, Power Quality Evaluation, Earthing, Reliability Assessments

Power System Protection – Unit Protection Settings, Bus Differential (87B), Transformer Differential (87T), Restricted Earth Fault, Directional Protection (67)

Electrical Engineering Standards – IEC 60502-2, IEC 60364-5-52

Software & Tools – SKM, EasyPower, ETAP, Power BI, Tableau, Python, Java, Spring Boot, SQL, AWS, Docker, Jenkins, Git, Jira, Confluence, Splunk, Dynatrace

Project Management & Communication – Client Requirement Interpretation, Technical Reporting, Stakeholder Management, Team Collaboration, Agile/Scrum Methodologies

Data Analysis & Reporting – DAX, Power Query, Data Modelling, ETL, KPI Tracking, Operational Alerting, Statistical Analysis

EDUCATION AND TRAINING

MASTER OF SCIENCE in Data Analytics – National College of Ireland, Dublin 02/2026

BACHELOR OF ENGINEERING in Computer Science – SNS College of Technology, Coimbatore, India 01/2021

PROJECTS

Power Systems Reliability Assessment Dashboard

- Developed a comprehensive dashboard using **Power BI** to visualize key reliability metrics and performance indicators for power systems, enabling proactive identification of potential failures.
- Integrated data from multiple sources, including simulation outputs and operational logs, using **Power Query** for ETL and data modelling to create a unified view of system health.
- Designed interactive reports and DAX measures to allow stakeholders to drill down into specific events and analyze root causes of system downtime, reducing incident investigation time by **15%**.

Automated Financial Transaction Monitoring System

- Built a Python-based system to automate the monitoring of financial transaction flows, identifying and flagging anomalies or failures in near real-time.
- Implemented REST APIs using **Java Spring Boot** for integration with existing enterprise systems, ensuring seamless data exchange and processing.
- Managed production deployments and monitoring using **AWS** services (EC2, CloudWatch) and **Jenkins** for CI/CD, achieving **99.95%** uptime for the monitoring service.

ACHIEVEMENTS & CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
