PROFESSIONAL EXPERIENCE

SOFTWARE ENGINEER – HCL Technologies | Chennai, India

09/2021 – 01/2025 (3.5 Years)

- Analyzed customer charging data against meter records (ESB Meters and GNI Meters) to identify and resolve discrepancies, ensuring system accuracy.
- Investigated root causes of revenue exceptions by examining detailed account data, including consumption patterns and tariff checks, leading to **30% faster resolution**.
- Developed and implemented automated processes using **Python scripting** for data validation and reporting, reducing manual effort by **15%**.
- Managed customer accounts with non-performing repayment plans, coordinating with third parties and initiating actions up to disconnection of supply.
- Facilitated repayment negotiations with customers for escalated accounts, establishing and monitoring plan performance to improve collection rates by **10%**.
- Provided direct support and guidance to Tier 1 Revenue Protection staff, improving overall team SLA adherence by **8%**.

SKILLS

Data Analysis & Reporting – Excel, Power BI, Tableau, DAX, Power Query, R, pandas, NumPy, scikit-learn

Financial Operations – Revenue Protection, Fraud Analysis, Account Management, Consumption Analysis, Repayment Negotiation, Debt Management, SLA Management

Technical Skills – SQL, Python, Java, Spring Boot, REST APIs, AWS, Docker, Linux, Git, Jenkins

Communication & Collaboration – Customer Engagement, Interpersonal Skills, Presentation Skills, Cross-functional Liaison, Technical Documentation

Business & Operations – Change Management, UAT Coordination, CRM Systems, MS Office Suite, Regulatory Compliance, GDPR Awareness

EDUCATION AND TRAINING

MASTER OF SCIENCE in Data Analytics – National College of Ireland, Dublin

02/2026

BACHELOR OF ENGINEERING in Computer Science – SNS College of Technology, Coimbatore, India

01/2021

PROJECTS

Energy Consumption Anomaly Detection Dashboard

- Developed an interactive **Power BI dashboard** to visualize energy consumption patterns and highlight anomalies against historical data and network meter readings.
- Integrated data from multiple sources using **Power Query** and applied **DAX measures** to calculate key performance indicators for revenue protection analysis.

- Enabled stakeholders to identify discrepancies in charging by providing a clear, visual representation of consumption trends and potential fraud indicators.

Automated Financial Reconciliation Service

- Built a **Python-based service** to automate the reconciliation of transaction data between internal systems and external financial feeds, improving accuracy.
- Implemented **SQL queries** against PostgreSQL databases to extract, transform, and load data, ensuring data integrity and compliance with audit trail requirements.
- Reduced manual reconciliation effort by **40%** and minimized data entry errors through automated processing and validation routines.

ACHIEVEMENTS & CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California, Davis** (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
